

Producing a Schedule C profit and loss — the whole job, step by step

Who this is for. Anyone doing this job for the first time, or for somebody else. It takes about twenty minutes with the figures to hand, and it needs nothing but a browser — no account, no internet connection, no spreadsheet programme.

What you end up with. Two files: a profit and loss statement and a Schedule C worksheet, as one PDF and one spreadsheet, saved on your own computer.

The example used throughout. A self-employed house painter, tax year 2025 — *Bell & Son Painting*. Real-shaped figures: paint and materials, a van on the mileage rate, two subcontractors, a small back-bedroom office, no stock. Every screenshot in this document is that job being done, in order, on 6 September 2026.

A note on dates, added the same evening. Every screenshot here is the build of 6 September 2026, 03:44. Later that day another session fixed several of the faults this walk found, so on a build after **17:08 that day** five of the warnings below no longer apply: the stock lines now clear themselves when you untick the box (step 8), *I am not claiming it* now clears line 30 (step 22), whole-dollar mode now rounds on screen as well as in the file (step 28), a refused figure and a listed cost with no amount now both say so in the panel (steps 19 and 34), and *Clear everything* now asks first (step 38). The steps and the screens are otherwise unchanged.

If a step does not match, that is either a fault or an out-of-date procedure, and finding out which is the job.

The route, before step 1

Seven stages, thirty-nine steps, one browser. Roughly twenty minutes with the figures in front of you.

A Set the job up Steps 1–8

Year, name, how you count income — and the stock question, which is the one that bites.

B Money coming in Steps 9–11

Lines 1 and 2. Check the income total before you type twenty expense lines.

C Money going out Steps 12–21

Part II line by line, the mileage and meals helpers, and the list of anything else.

D Home and van Steps 22–26

The home office, then the vehicle questions — which only exist because line 9 has a figure.

E Check, then produce Steps 27–31

Read the panel, pick cents or whole dollars, download the PDF and the spreadsheet.

F Keep it and check it Steps 32–38

Save a draft, open both files and read them, then clear the machine if it is not yours.

G Prove it yourself Step 39

Pull the network out and do it again. It still works — that is the privacy claim, checked.

What happens between the screens

Tick the stock box

Part III appears — six inventory lines. Untick it and they go, but anything typed in them stays in your figures.

Line 9 gets a figure

A whole section of vehicle questions appears further down, with your miles already in it.

A file downloads

A panel that was hidden until now appears at the foot of the page. Never before the file.

A figure cannot be read

It is refused where you typed it, the profit above quietly leaves it out, and both download buttons go dead.

The figures this example uses

Where	What	Figure
Line 1	Sales and receipts	86,417.25
Line 2	A deposit refunded	350.00
Line 8	Advertising — signs, van lettering, local ads	642.10
Line 9	Van, from 9,240 business miles at the 2025 rate	6,468.00
Line 11	Two subcontract painters	7,800.00
Line 15	Public liability insurance	1,860.00
Line 16b	Interest on the van loan	481.36
Line 17	Last year's accountant	450.00
Line 18	Office expenses	212.44
Line 20a	Sprayer and scaffold hire	380.00
Line 21	Repairs and servicing	518.75
Line 22	Paint, rollers, tape, dust sheets	12,483.91
Line 23	Contractor licence	310.00
Line 24b	Meals, the deductible half of 843.60	421.80
Line 25	Work phone and lock-up electricity	1,318.44
Part V	Small tools · trade dues · protective clothing	690.00 · 180.00 · 264.50
Line 30	Home office, 120 square feet	600.00

The answer this produces: a net profit of \$50,985.95. If you follow the steps with these figures and land on that number, the tool is behaving. If you land somewhere else, one of the steps below did not take.

Part A · Set the job up

Step 1 · Open the tool

Open `satcllp.com/tools/schedule-c-profit-and-loss/`. (Or open the saved `index.html` file — it works the same either way, including with no internet.)

A correct screen: a dark blue header, the three promises under it, and then two columns — the form on the left starting at *Which year, and whose business*, and a panel on the right headed *Where you are* with four dashes in it. Both download buttons at the bottom of that panel are greyed out, and under them it says "Nothing has been entered yet."

Step 2 · Pick the tax year

Set *Tax year* to the year you are doing. The choices are 2025, 2024 and 2023.

A **correct screen**: the year you picked shows in the box. This matters more than it looks — the line numbers move between years. Other expenses land on line **27b** for 2025 and on **27a** for 2023 and 2024, because the IRS swapped them.

Schedule C profit and loss

Put in what your business took and what it spent. Get back a profit and loss statement and a Schedule C worksheet — as a PDF and as a spreadsheet you can still edit.

Free, and no sign-up. No email, no account, nothing to click past to get your file.

Your figures stay on your computer. There is no server to send them to. Turn your internet off and this page still works — that is the test.

Built by a CPA. The line numbers come from the IRS form for the year you pick, and they change between years.

Detail — Yes is picked
☒

Step 7 • Decide about stock

Only tick *"I buy or make things to sell, and I count stock"* if you hold things you intend to sell. A painter does not: paint goes on the customer's wall, it is not held for resale. It belongs on line 22 Supplies, not here.

A correct screen when you tick it to look: six numbered lines appear — 35 Opening inventory, 36 Purchases, 37 Cost of labour, 38 Materials and supplies, 39 Other costs, 41 Closing inventory.

\$
38 Materials and supplies
\$ 12,483.91
39 Other costs
\$
41 Closing inventory
\$

Step 8 · If you typed anything there, clear it before you untick

Delete anything you typed in the stock lines, and only then untick the box.

This step is not optional and the screen will not tell you. Unticking the box hides the six lines but keeps whatever is in them in your figures — with no field left anywhere on the page showing it. Your profit will be wrong and nothing will say so.

A correct screen: the box clear, the six lines gone, and the right-hand panel back to four dashes. *If Money coming in is showing a figure with nothing typed in Part I, you have the leftover — tick the box, clear the fields, untick again.*

The screenshot shows a tax calculation form with several sections. The 'Stock and what it cost you' section is highlighted with a red box. This section includes a title, a subtitle, and a checkbox. The checkbox is currently unchecked. The right-hand panel contains various settings and options, including 'Where you are', 'Profit for the year', 'How to show the figures', 'What goes in the PDF', 'Worth checking', and a 'Clear everything' button. The bottom of the form has a footer with a detail note.

Stock and what it cost you

Money coming in \$86,067.25

Money going out —

Working from home —

Profit for the year \$86,067.25

Part C • Money going out

Step 12 • Type the everyday expense lines

Work down Part II and type the figure you are claiming on each line that applies. Skip anything that does not. In this example: 8, 11, 15, 16b, 17, 18, 20a, 21, 22, 23 and 25 — the figures are in the table at the top.

Enter the amount you are claiming, not what you spent. Schedule C is a claimed-figures form.

A correct screen: each figure sits right-aligned in its box and *Money going out* climbs as you go. After these eleven lines it reads **\$26,457.00**.

The screenshot shows the 'Where you are' section of the IRS Schedule C form. It lists various expenses with input fields for their amounts. The expenses listed are:

- 11 Contract labour and subcontractors: \$ 7,800
- 12 Depletion: \$
- 13 Depreciation and equipment written off: \$
- 14 Employee benefits: \$
- 15 Insurance: \$ 1,860
- 16a Mortgage interest: \$
- 16b Other interest: \$ 481.36
- 17 Legal and professional fees: \$ 450
- 18 Office expenses: \$ 212.44
- 19 Pension and profit sharing: \$

On the right side, the 'Where you are' summary shows:

- Money coming in: \$86,067.25
- Money going out: \$26,457.00
- Working from home: —
- Profit for the year: \$59,610.25

Below the summary, there are options for 'How to show the figures' (Dollars and cents, Whole dollars, The way it is filed) and 'What goes in the PDF' (Both, The profit and loss only, The Schedule C worksheet only). There are also buttons for 'Download the PDF' and 'Download the spreadsheet'. A checkbox for 'Keep what I have typed on this device' is also present.

At the bottom, a detail box shows the following summary:

Money coming in	\$86,067.25
Money going out	\$26,457.00
Working from home	—
Profit for the year	\$59,610.25

Step 13 · Line 13 — leave it blank unless you have the figure

If you have a depreciation schedule or a Form 4562, type the figure. If you do not, leave line 13 empty and tell your preparer what you bought.

The tool will not work depreciation out — it depends on what each item cost, when you started using it, and what you have already claimed in earlier years.

A correct screen: under the box, in small grey type: *"From your depreciation schedule or Form 4562. This tool does not work it out."* If you do put a figure there, Worth checking on the right adds: *"Depreciation usually means Form 4562 goes with the return too."*

The screenshot shows a tax calculation tool interface. On the left, there is a list of deduction lines with input fields for dollar amounts. Line 13, 'Depreciation and equipment written off', has the value '1150' entered. Below this line, a small grey note states: 'From your depreciation schedule or Form 4562. This tool does not work it out.' On the right, a summary panel titled 'Where you are' shows a profit for the year of \$58,460.25. Below this, there are options for how to show figures and what goes in the PDF. At the bottom of the summary panel, a 'Worth checking' section highlights line 13 with the text: 'Depreciation usually means Form 4562 goes with the return too.' Below the main interface, a detailed view of line 13 is shown, highlighting the input field with '1150' and the same grey note.

Line	Description	Amount
9	Car and truck	
10	Commissions and fees	
11	Contract labour and subcontractors	7,800
12	Depletion	
13	Depreciation and equipment written off	1150
14	Employee benefits	
15	Insurance	1,860
16a	Mortgage interest	
16b	Other interest	481.36
17	Legal and professional fees	

Where you are

Detail — 9,240 miles at the 2025 rate, with the IRS notice named

▼ Work it out from miles

Only if you are using the standard mileage rate. If you are claiming what the vehicle actually cost you, enter that figure instead — this tool does not work that out.

9240

Use this figure

\$6,468.00 — 9,240 business miles at 70 cents a mile. Source: IRS Notice 2025-5 (announced in IR-2024-312).

Step 16 · Put the figure on line 9

Click *Use this figure*.

A correct screen: line 9 now holds **6,468.00**, *Money going out* has risen by it, and further down the page a new section headed *Your vehicle* has appeared.

Remember what that figure already covers: the mileage rate includes the van's fuel, insurance, servicing and repairs. Do not also claim those on lines 15 and 21.

Stock and what it cost you
Only if you hold stock. Skip it if you sell your time.
☐ I buy or make things to sell, and I count stock

Step 17 • Work out the deductible half of your meals

On line 24b, click *Take half of what I spent* and type what the qualifying meals cost.

Qualifying meals only — a meal with a business reason, or one on a trip that kept you away overnight. An ordinary lunch while working locally is not deductible, and the box will happily halve it for you anyway.

A correct screen: "\$421.80 — half of what you spent. Some meals are not half. Drivers under federal hours-of-service rules deduct 80%, and a few meals count in full."

The screenshot shows the IRS Form 990-EZ software interface. The sidebar on the left lists various expense categories: 21 Repairs and maintenance (\$518.75), 22 Supplies (\$12,483.91), 23 Taxes and licences (\$310), 24a Travel, 24b Meals (deductible part), 25 Utilities (\$1,318.44), 26 Wages, and 27a Energy efficient buildings deduction. The main form area for 24b Meals (deductible part) includes a text input field with a dollar sign, a summary box with a dropdown arrow, a text input field containing '843.60', a 'Use this figure' button, and a paragraph explaining the calculation: '\$421.80 — half of what you spent. Some meals are not half. Drivers under federal hours-of-service rules deduct 80%, and a few meals count in full.' The right-hand panel shows 'Where you are' with a summary of income and expenses, 'Profit for the year' (\$53,142.25), and options for how to show figures and what to include in the PDF. It also has buttons for 'Download the PDF' and 'Download the spreadsheet', and a checkbox for 'Keep what I have typed on this device'.

Detail — half of what I spent on meals, with the exception named

24b Meals (deductible part)
\$

The part you can deduct — usually half.

▼ Take half of what I spent
843.60 Use this figure
\$421.80 — half of what you spent. Some meals are not half. Drivers under federal hours-of-service rules deduct 80%, and a few meals count in full.

Step 18 · Put the meals figure on line 24b

Click *Use this figure*.

A correct screen: line 24b holds **421.80** and *Money going out* is up by it.

The screenshot shows a tax software interface with a summary panel on the right and a list of expenses on the left. The summary panel, titled 'Where you are', shows the following figures:

Where you are	
Money coming in	\$86,067.25
Money going out	\$33,346.80
Working from home	—
Profit for the year	\$52,720.45

Below the summary, there are options for 'How to show the figures' and 'What goes in the PDF'. The 'How to show the figures' section has three radio buttons: 'Dollars and cents' (selected), 'Whole dollars, the way it is filed', and 'The profit and loss only'. The 'What goes in the PDF' section has three radio buttons: 'Both' (selected), 'The profit and loss only', and 'The Schedule C worksheet only'. There are buttons for 'Download the PDF' and 'Download the spreadsheet'. At the bottom of the summary panel, there is a checkbox for 'Keep what I have typed on this device' and a 'Clear everything' button. A note at the bottom of the summary panel says: 'Would rather not do this again next year? [We take on sole traders.](#)'

The left panel shows a list of expenses with their respective amounts:

Line	Expense	Amount
21	Repairs and maintenance	\$ 518.75
22	Supplies	\$ 12,483.91
23	Taxes and licences	\$ 310
24a	Travel	\$
24b	Meals (deductible part)	\$ 421.80
25	Utilities	\$ 1,318.44
26	Wages	\$
27a	Energy efficient buildings deduction	\$

The 'Meals (deductible part)' section (line 24b) is highlighted with a red box. It shows the value 421.80 and the 'Use this figure' button. Below this, there is a note: 'The part you can deduct — usually half.' and a section titled 'Take half of what I spent' with the value 843.60 and the 'Use this figure' button. At the bottom of the red box, there is a note: '\$421.80 — half of what you spent. Some meals are not half. Drivers under federal hours-of-service rules deduct 80%, and a few meals count in full.'

Detail — line 24b holds 421.80

24b Meals (deductible part)

\$ 421.80

The part you can deduct — usually half.

▼ Take half of what I spent

843.60 Use this figure

\$421.80 — half of what you spent. Some meals are not half. Drivers under federal hours-of-service rules deduct 80%, and a few meals count in full.

Step 19 • List the first cost that has no line of its own

Under *Anything else you spent money on*, type what it was in the left box and the amount in the right. Software, bank charges, dues, small tools.

A correct screen: both boxes filled and *Money going out* up by the amount. A row with a description and no amount is dropped without a word, so always fill in both.

25 Utilities
\$ 1,318.44

26 Wages
\$
Wages you paid other people. Not money you took yourself.

Step 28 • Choose how the figures are shown

Leave *How to show the figures on Dollars and cents* unless you have a reason not to. Cents are what a preparer or a bank wants. *Whole dollars, the way it is filed* is for matching what will go on the return.

A correct screen: the panel figures switch between \$50,985.95 and \$50,985.

Known fault: in whole-dollar mode the panel *cuts* the cents while the file *rounds* them, so the screen can read a dollar lower than the PDF you are about to download — \$50,985 on screen against 50,986 in the file. The file is the correct one. Use *Dollars and cents* and the question does not arise.

This is the square-foot method. If you worked yours out the detailed way on Form 6062, enter that figure instead.

120 Use this figure

\$600.00 — 120 square feet at \$5 a square foot. Source: 2025 Instructions for Schedule C, line 30 (Simplified Method).

Step 31 · The offer appears — after the file, not before

Scroll to the bottom.

A correct screen: a panel headed *You have your file* that was not there before. It is hidden until a file has actually been produced. **If you are ever asked for an email address before a download, you are not on this tool.**

The screenshot shows a web application interface. At the top, there is a section with three bullet points: 'Depreciation and equipment written off', 'Business use of your home, the detailed way', and 'Whether a loss is one you can actually use this year'. To the right of this section is a 'Download the spreadsheet' button and a checkbox labeled 'Keep what I have typed on this device'. Below the checkbox is a 'Clear everything' button and a link 'We take on sole traders'. In the center, a panel titled 'You have your file' is highlighted with a red border. This panel contains the text: 'If handing this year to someone would be a relief, that is what we do. We take on sole traders, we tell you the price before we start, and nothing begins until you have seen it and said yes.' and a 'Tell us about your year' button. Below this panel is a section titled 'The small print, in plain words' containing several paragraphs of text. At the bottom, a footer section is titled 'Detail — the offer, which is hidden until a file has been produced' and contains the same 'You have your file' panel as above.

mileage rate above.

- **Depreciation and equipment written off.** It depends on what each item cost, when you started using it, and what you have already claimed in earlier years. Take the figure from your depreciation schedule or Form 4562 and type it in.
- **Business use of your home, the detailed way.** The detailed method needs your mortgage or rent, taxes, insurance, utilities and repairs, split by floor area. Use Form 8829 and enter the result, or use the square-foot method above.
- **Whether a loss is one you can actually use this year.** That depends on money you have at risk, on other income, and on rules that reach outside this form. This tool shows the loss. Whether you can take it all this year is a question for your return.

Download the spreadsheet

☐ Keep what I have typed on this device

Off by default. It saves in this browser only, and never leaves it. Do not tick it on a shared or library computer.

You have your file

If handing this year to someone would be a relief, that is what we do. We take on sole traders, we tell you the price before we start, and nothing begins until you have seen it and said yes.

Tell us about your year

Part F · Keep it, check it, put it away

Step 32 · Keep a draft, if the computer is yours

Tick *Keep what I have typed on this device* **only on your own machine**. It is off when the page opens, and the draft is stored in that browser and nowhere else.

A correct screen: the box ticked. **Do not tick it on a shared or library computer.**

The screenshot shows a tax software interface with several sections. On the left, there are radio buttons for 'Yes' and 'No' under the heading 'Are those records written down?'. Below this is a section titled 'What this tool will not do' with four bullet points: 'Car and truck costs, if you are not using the mileage rate', 'Depreciation and equipment written off', 'Business use of your home, the detailed way', and 'Whether a loss is one you can actually use this year'. On the right, there is a 'Profit for the year' section showing '\$50,985.95', followed by 'How to show the figures' with radio buttons for 'Dollars and cents', 'Whole dollars, the way it is filed', and 'Both'. Below this is 'What goes in the PDF' with radio buttons for 'The profit and loss only' and 'The Schedule C worksheet only'. There are two buttons: 'Download the PDF' and 'Download the spreadsheet'. A red box highlights the 'Keep what I have typed on this device' option, which is checked. Below it is a 'Clear everything' button. At the bottom, there is a section titled 'You have your file' with a paragraph and a 'Tell us about your year' button. A detail view at the bottom shows the 'Keep what I have typed on this device' option checked, with a red box around it and a 'Clear everything' button.

☒ Yes
☐ No
Are those records written down?
☒ Yes
☐ No

What this tool will not do

- **Car and truck costs, if you are not using the mileage rate.** Adding up petrol, repairs and depreciation needs the cost of the vehicle and the share of miles that were for business. Work out the deduction the way you always do, or use the mileage rate above.
- **Depreciation and equipment written off.** It depends on what each item cost, when you started using it, and what you have already claimed in earlier years. Take the figure from your depreciation schedule or Form 4562 and type it in.
- **Business use of your home, the detailed way.** The detailed method needs your mortgage or rent, taxes, insurance, utilities and repairs, split by floor area. Use Form 8829 and enter the result, or use the square-foot method above.
- **Whether a loss is one you can actually use this year.** That depends on money you have at risk, on other income, and on rules that reach outside this form. This tool shows the loss. Whether you can take it all this year is a question for your return.

Detail — after a reload the figures are back

Money coming in \$86,067.25

Money going out \$34,481.30

Working from home \$600.00

Profit for the year \$50,985.95

Step 34 • What a refused figure looks like

Recognise this, because you will hit it: type a figure the tool cannot read — two decimal points, letters, three decimal places — and it is refused where you typed it.

A correct screen: red text under the box saying what is wrong, for example *"Use numbers only, like 1234.56"*.

What the screen does not tell you: while a figure is refused, both download buttons go dead with no explanation, and the profit at the top of the panel silently leaves that line out — so it will be wrong, and it will look plausible. **If the download buttons are greyed out on a filled-in form, scroll up and look for red text.**

The screenshot shows a tax form interface with a list of expenses on the left and a summary panel on the right. The 'Repairs and maintenance' entry (21) has a value of 518.7.5 entered, which is highlighted with a red box. Below the input field, red text reads: "Use numbers only, like 1234.56". The right panel shows a summary of income and expenses, with the profit for the year calculated as \$51,504.70. The 'Where you are' section shows income and expenses. The 'How to show the figures' section has radio buttons for 'Dollars and cents' (selected), 'Whole dollars, the way it is filed', and 'The Schedule C worksheet only'. The 'What goes in the PDF' section has radio buttons for 'Both' (selected), 'The profit and loss only', and 'The Schedule C worksheet only'. The 'Download the PDF' and 'Download the spreadsheet' buttons are greyed out. The 'Keep what I have typed on this device' checkbox is checked. The 'Clear everything' button is visible. The 'Would rather not do this again next year? We take on sole traders.' link is also present.

Detail — the bad figure is refused where it was typed, and left out of the total

21 Repairs and maintenance

\$ 518.7.5

Use numbers only, like 1234.56

Step 35 • Look at the whole form once, top to bottom

Scroll from the top to the bottom and read it. Two minutes. This is the last point at which a figure in the wrong box is cheap to fix.

A correct screen: every figure where you meant to put it, no red text anywhere, and the profit at the top matching what you expected before you started.

The whole form, in two columns — left column is the top of the page, right column continues below it

25 THOMPSON ACCOUNTING, P.A. & CONSULTING

Schedule C profit and loss

Put in what your business took and what it spent. Get back a profit and loss statement and a Schedule C worksheet — as a PDF, and as a spreadsheet you can still edit.

Free, and no sign-up. No email, no account, nothing to click past to get your file.

Your figures stay on your computer. There is no server to send them to, turn your internet off and the page still works — free to the user.

Built by a CPA. The line numbers come from the 995 form for the year you pick, and they change between years.

Part III: Cost of goods sold

30. Inventory at beginning of year. If different from last year's, attach Form 9700	
31. Inventory at end of year. Subtract line 30 from line 31	1,122.44
32. Net profit or (loss). Subtract line 31 from line 32	55,257.75

Part V: Other expenses (carried to line 27)

33. Total sales	55,417.25
34. Total expenses	31,441.38
35. Profit before home office	23,816.37
36. Business use of your home	899.00
37. Net profit or (loss)	24,715.37

What the form also asks

38. Accounting method	Other
39. Did the business regularly (line 38)?	Yes
40. If the answer to line 39 is "No," check the box that applies	Not applicable
41. Gross income (line 7)	55,257.75
42. Cost of goods sold (line 12)	1,122.44
43. Gross profit (line 5)	54,135.31
44. Net profit or (loss) (line 29)	24,715.37
45. Are there any other expenses (line 18)?	Yes
46. If "Yes," enter the amount of other expenses (line 18)	5,715.50
47. Are there any other expenses (line 18)?	Yes
48. If "Yes," enter the amount of other expenses (line 18)	5,715.50
49. Are there any other expenses (line 18)?	Yes
50. If "Yes," enter the amount of other expenses (line 18)	5,715.50

What this tool did not work out

Line 5: The worksheet asks if you are not using the mileage rate. Making up petrol, repairs and depreciation needs for cost of other vehicles and the value of miles that were for business. Work out the deduction the way you always do.

Page 3 — the tail of the refusals

or use the mileage rate above:

Line 5B

Business use of your home. See attached copy. The attached refund needs your knowledge of rent, home insurance, other and repairs. See the form, line 5B and enter the result. If you are not using the mileage rate, enter the result.

There are your own figures, entered on the income Schedule C, lines 1-11, and a tax return, and a check on what you are allowed to deduct. Making up and preparing — it was entered on the form — the mileage rate.

If you would rather have this page to business, see the form, line 5B and enter the result. If you are not using the mileage rate, enter the result.

Step 37 · Open the spreadsheet and check the three tabs

Open the downloaded `.xlsx`.

A correct document: three sheets — *Profit and loss*, *Schedule C 2025*, and *Detail*. The totals on the worksheet sheet are live formulas, not typed numbers, so a preparer can change a figure and watch the total follow. *Detail* carries the listed other expenses, the answers to what the form also asks, and anything the tool did not work out.

Blank means blank. A line nobody filled in is empty, never 0.00 — on a worksheet those mean different things.

Step 38 · Clear everything when you are done on a machine that is not yours

Click *Clear everything*.

There is no "are you sure". It wipes the whole form and the saved draft the instant you click it, and the button sits three lines under *Download the spreadsheet*. Download your files first.

A correct screen: every box empty, the panel back to four dashes, the keep-a-draft box unticked, and nothing left in the browser.

The screenshot shows a web-based tax form interface. A red rectangular box highlights a panel on the right side of the form, titled "Where you are". This panel contains several sections: "Where you are" with three dashed lines, "Profit for the year" with three dashed lines, "How to show the figures" with radio buttons for "Dollars and cents" (selected), "Whole dollars, the way it is filed", and "Both", "What goes in the PDF" with radio buttons for "Both" (selected), "The profit and loss only", and "The Schedule C worksheet only", "Download the PDF" and "Download the spreadsheet" buttons, "Worth checking" with a red status message "Nothing has been entered yet.", a checkbox for "Keep what I have typed on this device" (unchecked), a "Clear everything" button, and a footer question "Would rather not do this again next year? We take on sole traders." The main form area on the left contains sections for "How you count income", "Money coming in", "Stock and what it cost you", and "Profit for the year".

How you count income

☒ When the money arrives

☐ When the work is done

☐ Something else

Did you work in this business regularly through the year?

☐ Yes

☐ No

Money coming in

What the business took, before you take anything off it.

1 Sales and receipts

\$

Everything the business was paid, including what came on a 1099.

2 Less: returns and allowances

\$

Refunds and credits you gave customers.

3 Other income

\$

Anything else the business earned that is not a sale.

Stock and what it cost you

Only if you hold stock. Skip it if you sell your time.

☐ I buy or make things to sell, and I count stock

Money going out —

Working from home —

Profit for the year —

How to show the figures

☒ Dollars and cents

☐ Whole dollars, the way it is filed

What goes in the PDF

☒ Both

☐ The profit and loss only

☐ The Schedule C worksheet only

Download the PDF

Download the spreadsheet

Worth checking

Nothing has been entered yet.

☐ Keep what I have typed on this device

Off by default. It saves in this browser only, and never leaves it. Do not tick it on a shared or library computer.

Clear everything

Would rather not do this again next year? [We take on sole traders.](#)

Part G · The check you can run yourself

Step 39 · Turn the internet off and do it again

Disconnect from the network, reload the page, type a figure and download a file.

The tool claims your figures never leave your computer. This is how you check that claim rather than take it on trust — a page that still works with the network off cannot be sending anything anywhere.

A correct screen: the page loads, the arithmetic still happens, and the PDF still downloads. On this run the page attempted **zero** network requests.

From your depreciation schedule or Form 4562. This tool does not work it out.

When something does not match

Every step above says what a correct screen looks like. If one does not match, it is either a fault in the product or this procedure is out of date, and finding out which is the job. Faults found on the run that produced this document are written up in `WALKTHROUGH-DEFECTS.md`, ranked by what each would cost.

The three worth knowing before you start, on the build these pictures were taken from: clear the stock lines before you untick that box (step 8); *I am not claiming it* does not clear line 30 (step 22); and in whole-dollar mode the screen reads a dollar lower than the file (step 28). All three were fixed later the same day — see the note at the top — so on a current build those three screens should behave, and if they do not, that is a regression worth reporting.
