

Taking a new client front to back

From an empty screen to a signed pack and a recorded payment, across both SAT-C applications.

Written by walking it, 5 September 2026 · every screen below was driven in a real browser and photographed as it appeared · the client, the figures and the documents are invented — no real client data appears anywhere in this document.

Read this once before you start. Each step is one action. Under each one, **Correct** tells you what the screen should look like, so you can tell when something has gone wrong. Where a step carries a **Careful** note, that is a fault in the software as it stands today — the note tells you how to work around it, not how to fix it.

THE ROUTE

Part A — The desk — satc_system

1 Start the desk app

Do Double-click `SATC.bat` in `satc_system\`. It opens your browser at `http://127.0.0.1:5050`. Leave the black window open — closing it stops the app.

CORRECT A left-hand menu of seventeen items, and the page title **Dashboard**. If the port is busy the app picks another one and prints it — read the address in the black window rather than assuming 5050.

Step 1 — Start the desk app. Photographed during the walk of 5 September 2026.

2 Check the machine is ready

Do Click **Setup** at the bottom of the menu.

CORRECT Seven rows, every one with a green tick. **Data store** shows the folder your practice data lives in — read it, and make sure it is the one you meant. **Cloud vision** should read **OFF** — *documents never leave this machine*.

The screenshot shows the 'Setup' screen of the SETHURAMAN application. The left sidebar contains a menu with items like Today, Dashboard, Intake, Sort & re-label, Staging, Documents (highlighted with a red circle and a '4' badge), Clients, Engagements, Questionnaires, Client comms, Work queue, Invoices, Pricing, Withholding, Export to Excel, Autonomy, and Setup. The main content area is titled 'Setup' with the tagline 'Complex work, made clear.' and the user 'A. Sethuraman - TY2024'. Below the title, there's a note about sample data and a 'Clear sample data' button. The 'Setup & readiness' section contains a 'Status' table with the following data:

ITEM	STATUS	WHAT TO DO
Python	3.12.10	
Data store	C:\Users\ajish\AppData\Local\Temp\cloude(C--Users-ajish-Documents-Main-Claude-SATC-Prod-Software\aa11979e-853a-4c9e-b934-7760c509d938\scratchpad\walkstore	
PDF reading	ready	
Web app	ready	
Local OCR (Tesseract)	ready — scans are read on this machine	
Local vision (Ollama)	enabled and reachable	
Cloud vision	OFF — documents never leave this machine	Only if you ever need it: set SATC_ALLOW_CLOUD=1 (plus an API key).

Below the table, it says 'Run satc doctor in a terminal to see this same report any time.' At the bottom, there's a 'Sample data' section with a note about demo clients and figures, and a 'Clear sample data & start clean' button.

Step 2 — Check the machine is ready. Photographed during the walk of 5 September 2026.

3 Clear the demo data — once, on a new install

Do Still on Setup, click **Clear sample data & start clean**. Your browser asks you to confirm; click OK. This cannot be undone.

CORRECT The cream banner across the top disappears, and so does the *Sample data* panel.

CAREFUL Do this **before** you add your first real client, not after. The banner comes back once a client exists (a known fault), and the button that clears it would then delete that client.

The screenshot shows the 'Setup' screen after the 'Clear sample data & start clean' button was clicked. The 'Status' table is identical to the previous screenshot, but the 'Sample data' section at the bottom is now gone. The 'Documents' menu item in the sidebar now has a red circle and a '2' badge. The top of the screen is now a solid cream color, and the 'Setup & readiness' section is no longer present.

Step 3 — Clear the demo data — once, on a new install. Photographed during the walk of 5 September 2026.

4 Create the client

Do Click **Clients**, then **+ New client** (or **Engagements** → **+ New client**). Choose **Person** or **Business**, type the first and last name, and click **Create client**. SSN, email and phone are optional.

CORRECT A page headed *<name> is set up — how do you want to start?* with three cards, and a reference like **SATC-001000** under the name.

CAREFUL The SSN box accepts anything at all — it does not check the format. Type it carefully.

The screenshot shows the 'New client' form in the SETHURAMAN software. The left sidebar contains a navigation menu with options like Today, Dashboard, Intake, Sort & re-label, Staging, Documents, Clients, Engagements, Questionnaires, Client comms, Work queue, Invoices, Pricing, Withholding, Export to Excel, Autonomy, and Setup. The main content area is titled 'New client' with a subtitle 'Complex work, made clear.' and a user identifier 'A. Sethuraman - TY2024'. Below the title, there's a section 'New client' with a description 'Set up a person or a business. The name lives only in the vault — everything downstream is de-identified.' The 'Client details' section has radio buttons for 'Person' (selected) and 'Business'. It includes input fields for 'First name', 'Last name', 'SSN' (marked as optional), 'Email' (marked as optional), and 'Phone' (marked as optional). At the bottom, there are 'Create client' and 'Cancel' buttons, followed by a note: 'Next you'll choose how to take them in — scan documents, interview, or email an organizer.'

Step 4 — Create the client. Photographed during the walk of 5 September 2026.

5 Choose how you are taking them in

Do Click **Start interview** → on the middle card, then pick the workflow that matches the job — for a personal return that is **Personal 1040 core**. Click **Start** →.

CORRECT The client's name and reference at the top, and only the workflows that suit that kind of client.

The screenshot shows the 'Intake' page in the SETHURAMAN software. The left sidebar is the same as in the previous screenshot. The main content area is titled 'Intake' with a subtitle 'Complex work, made clear.' and a user identifier 'A. Sethuraman - TY2024'. Below the title, there's a section 'New intake' with a description 'Priya Raghavan - SATC-001000 - INDIVIDUAL'. The 'Choose a workflow' section has a table with three workflows: 'Personal 1040 core', 'Personal Schedule C', and 'Personal rental Schedule E'. Each workflow has a 'Start' button. The table also includes a 'WHAT IT COVERS' column with descriptions for each workflow.

Step 5 — Choose how you are taking them in. Photographed during the walk of 5 September 2026.

6 Run the interview

Do Choose **New client** or **Returning client**, set the **Filing status**, then work down the thirteen questions. Fill in **Due date** and **Tax year** at the bottom and click **Generate checklist**.

CORRECT You land on the engagement, showing the workflow, tax year, due date and a scoreboard.

CAREFUL Every question starts on “No”. Nothing marks a question as unasked, and the internal checklist prints those defaults as the client's own answers — including the three risk questions (marketplace insurance, digital assets, foreign accounts). Touch every row deliberately.

The screenshot shows the 'Intake' form for a new client. The form is titled 'New intake' and includes a 'Personal 1040 core' section. The client is identified as Priya Raghavan, SATC-881888, an individual. The form includes a 'Filing status' dropdown menu and a table of thirteen questions with 'Yes' and 'No' radio button options. The 'No' option is selected for all questions. The questions are: Filing status, spouse, dependent, custody, or childcare changes?; Moved states during the year?; State income tax return required?; State returns needed in more than one state?; Marketplace health insurance coverage? (risk); Education expenses or scholarship activity?; Retirement distributions or IRA activity?; HSA or MSA activity?; Brokerage sales or investment activity?; and three risk questions: Marketplace health insurance coverage? (risk), Education expenses or scholarship activity?, and Retirement distributions or IRA activity?.

New intake
Priya Raghavan · SATC-881888 · INDIVIDUAL

Personal 1040 core

This is a **New client** Returning client

New client — let's capture the full picture so we know exactly what to request.

Filing status
— selected —

QUESTION	ANSWER
Filing status, spouse, dependent, custody, or childcare changes?	☐ Yes ☒ No
Moved states during the year?	☐ Yes ☒ No
State income tax return required?	☐ Yes ☒ No
State returns needed in more than one state?	☐ Yes ☒ No
Marketplace health insurance coverage? (risk)	☐ Yes ☒ No
Education expenses or scholarship activity?	☐ Yes ☒ No
Retirement distributions or IRA activity?	☐ Yes ☒ No
HSA or MSA activity?	☐ Yes ☒ No
Brokerage sales or investment activity?	☐ Yes ☒ No

Step 6 — Run the interview. Photographed during the walk of 5 September 2026.

7 Record the engagement reference

Do In the **Engagement ref** box type the number from the client's own paperwork — the format is **YYYY–NNNN**, e.g. **2026–0001** — and click **Record ref**.

CORRECT Recorded. Clearing the box and saving removes it. Anything that is not YYYY–NNNN is refused by name, and a good reference already on file is not disturbed by a failed attempt.

CAREFUL This is the join between the letters the client holds and this system's own key. Until it is set, an arriving document cannot be matched to this client.

Engagements "Complex work, made clear."

Showing built-in sample data (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads. [Clear sample data](#)

Priya Raghavan
personal_1848_core · Tax year 2025 · Due 2026-04-15

0/3 REQUESTS RECEIVED 0/3 TASKS COMPLETE 0 RISK FLAGS

Engagement ref — the number the client sees on their own paperwork

This is the join to the engagement record: the client's letters, estimate and invoices all carry YYYY–NNNN, while this system keys on SATC–881888, which a client is never shown. A drop folder named for the ref can only be matched to this client once it is recorded here.

2026-0001 **Record ref** Recorded. Clearing the box and saving removes it.

Requested documents — what we asked the client for

Email request (Outlook draft) [Send organizer to verify](#) [View email text](#) [Print client list](#) [Print internal checklist](#)

STATUS	REQUEST	SUGGESTED BY	MARK
Requested	Upload Forms W-2, 1099-INT, 1099-DIV, 1099-B, 1099-G, and any other income forms received. Core tax reporting documents are needed to prepare the Form 1040.	2026-03-25	Done
Requested	Upload prior-year federal and state tax returns, carryforward schedules, and any IRS or state notices received during the year.	2026-03-26	Done
Requested	Upload your consolidated brokerage 1099 package, realized gain detail, basis support, and crypto exchange transaction exports or CSV files.	2026-04-01	Done

Internal tasks — our side of the work

Step 7 — Record the engagement reference. Photographed during the walk of 5 September 2026.

8 Send the document request

Do On the engagement, click **View email text** to read the request, or **Print client list** for a paper copy. ✉ **Email request (Outlook draft)** opens a draft — it does not send.

CORRECT The requests grouped under headings (Core documents, Prior year, Investments), each with a suggested-by date.

Subject: Requested items for Priya Raghavan - Personal 1848 core

Hello Priya Raghavan,

I hope you are well. SAT-C LLP is preparing your Personal 1848 core checklist due Apr 15, 2026. Please provide or review the following client-facing items when convenient.

Core documents

- Upload Forms W-2, 1099-INT, 1099-DIV, 1099-B, 1099-G, and any other income forms received. (suggested by Mar 25, 2026)

Prior year

- Upload prior-year federal and state tax returns, carryforward schedules, and any IRS or state notices received during the year. (suggested by Mar 26, 2026)

Investments

- Upload your consolidated brokerage 1099 package, realized gain detail, basis support, and crypto exchange transaction exports or CSV files. (suggested by Apr 1, 2026)

If you have questions about any item, please reply here and we will be happy to help.

Thank you,
SAT-C LLP

Step 8 — Send the document request. Photographed during the walk of 5 September 2026.

9 Track what has come back

Do Click **Documents**. Click **Received** when something arrives. To close a request that will never arrive, type the reason in the box and click **N/A**.

CORRECT The row turns **satisfied** or **n/a** and the red badge on the menu counts down. **N/A** without a reason is refused — “a bare N/A is indistinguishable from never having asked.”

CAREFUL **Received** closes the request but does not write anything into the *Arrived* register below it — the one the screen says a regulation requires. Keep your own note of how and when a document reached you.

The screenshot shows the SETHURAMAN Accounting - Tax Consulting web application. The left sidebar contains a navigation menu with items: Today, Dashboard, Intake, Sort & re-label, Staging, Documents (highlighted with a red badge showing '5'), Clients, Engagements, Questionnaires, Client comms, Work queue, Invoices, Pricing, Withholding, Export to Excel, Autonomy, and Setup. The main content area is titled 'Documents' with a subtitle 'Complex work, made clear.' and a user indicator 'A. Sethuraman - TY2024'. Below the title, a note states: 'Showing built-in sample data (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads. Clear sample data'. The 'Documents' section includes a descriptive paragraph and a 'Who owes us a document' summary: '0 to chase'. The 'Asked for' section shows 5 open items in a table.

CLIENT	DOCUMENT	BLOCKS	STATUS	CLOSE IT
2825	Core income documents Upload Forms W-2, 1099-INT, 1099-DIV, 1099-B, 1099-G, and any other income forms received.	---	outstanding asked Sep 05	Received not applicable because... N/A
2825	Prior-year return Upload prior-year federal and state tax returns, carryforward schedules, and any IRS or state notices received during the year.	---	outstanding asked Sep 05	Received not applicable because... N/A
Priya Raghavan 2825	Core income documents Upload Forms W-2, 1099-INT, 1099-DIV, 1099-B, 1099-G, and any other income forms received.	---	outstanding asked Sep 05	Received not applicable because... N/A
Priya Raghavan 2825	Prior-year return Upload prior-year federal and state tax returns, carryforward schedules, and any IRS or state notices received during the year.	---	outstanding asked Sep 05	Received not applicable because... N/A
Priya Raghavan 2825	Brokerage 1099 / crypto exports Upload your consolidated brokerage 1099 package, realized gain detail, basis support, and crypto exchange transaction exports or CSV files.	---	outstanding asked Sep 05	Received not applicable because... N/A

Marking something not applicable **needs a reason** — “they closed that account in March” is a record that the gap was considered. A bare N/A is indistinguishable from never having asked.

Step 9 — Track what has come back. Photographed during the walk of 5 September 2026.

10 Read a folder of the client's documents

Do Click **Intake**, type or paste the full path to the folder, and click **Scan folder**. Check the list, then click **Read & stage these N documents** →.

CORRECT Each file with its detected type, how it was identified (*text* is a real read; *filename* is a guess) and a confidence badge.

CAREFUL **Two faults live on this screen.** If the folder does not exist you get either a confident list of somebody else's six demo documents, or nothing at all — never “that folder is not there.” Check the path character by character. And **everything you post from here goes to client SATC-001000 and tax year 2024, whoever you meant.** Until that is fixed, use this screen only when SATC-001000 is the client you want.

The screenshot shows the SETHURAMAN Intake interface. The left sidebar contains a navigation menu with items: Today, Dashboard, Intake (selected), Sort & re-label, Staging, Documents (4), Clients, Engagements, Questionnaires, Client comms, Work queue, Invoices, Pricing, Withholding, Export to Excel, Autonomy, and Setup. The main content area is titled "Intake" with a subtitle "Complex work, made clear." and a user indicator "A. Sethuraman · TY2024". Below the title, a message states: "Showing built-in sample data (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads." with a "Clear sample data" button. A section titled "Point SATC at the client's files." explains that SATC reads each document and stages everything for review. Below this, a text input field contains the path "C:\Users\ajish\AppData\Local\Temp\claude\C--Users-ajish-Documents-Main-Claude-SATC-Prod-Software\aa11979e-853a-4c9e-b934-7fe0c509d938\scratchpad\realfolder" and a "Scan folder" button. A message states: "Found 5 documents in 'C:\Users\ajish\AppData\Local\Temp\claude\C--Users-ajish-Documents-Main-Claude-SATC-Prod-Software\aa11979e-853a-4c9e-b934-7fe0c509d938\scratchpad\realfolder'". Below this, a table lists the documents:

FILE	DETECTED TYPE	HOW IT WAS IDENTIFIED	CONFIDENCE
1098-Mortgage-Cedarpost-Bank..pdf	1098 - filed, not extracted	text	HIGH
1099-DIV-Marrowsstone-Funds.pdf	1099-DIV	text	HIGH
1099-INT-Harborline-Credit-Union.pdf	1099-INT	text	HIGH
W2-Okonkwo-Daniel.pdf	W-2	text	HIGH
W2-Raghavan-Pritya.pdf	W-2	text	HIGH

Below the table, there are two buttons: "Read & stage these 5 documents →" and "Sort & re-label this folder →".

Step 10 — Read a folder of the client's documents. Photographed during the walk of 5 September 2026.

11 Confirm what was read

Do Click **Staging**. Check each value against the document on the right — **View source** ↗ opens it. Correct anything wrong and click **Save** on that row; **Confirm** accepts a flagged one; **Delete** removes a stray.

CORRECT Every row shows a confidence, a status, and who put it there — `system:intake` for a machine read, `human:owner` once you touch it.

CAREFUL A money box accepts any text at all, and if what you type is not a number the workpaper silently keeps the machine's original figure while the screen goes on showing yours as confirmed. After correcting a figure, check it on the client page.

Step 12 — Post the confirmed values. Photographed during the walk of 5 September 2026.

13 Raise the invoice

Do Click **Invoices** → **Raise an invoice**. Pick the client and tax year. If the client is on a reduced rate, choose it, type the reason in **Why this client is on that plan**, and click **Set**. Then pick the service, quantity, and click **Add to the invoice**.

CORRECT A **What the client will see** block: full value, the named reduction, and the total due.

CAREFUL The red line saying *“No rate plan agreed ... the practice default ‘standard’ applies”* does not update when you set a plan. **Trust the totals at the bottom, not that sentence.** A reduced rate with no reason is silently ignored — check the totals to see whether it took.

Step 13 — Raise the invoice. Photographed during the walk of 5 September 2026.

14 Issue it

Do Set the issue date and the payment terms, then click **Issue invoice**.

CORRECT The invoice gets its number, and the page says it cannot be edited — only credited or replaced. **Printable copy** gives the client's version. Issuing sends nothing.

Invoice 2026-0001 "Complex work, made clear"

Showing built-in **sample data** (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads. [Clear sample data](#)

Invoice 2026-0001 — Priya Raghavan

This is the invoice as the client reads it. It was issued September 05, 2026 and cannot be edited; correcting it means a new invoice or a credit.

The invoice

Client	Priya Raghavan SATC-001000
Tax year	2025
Rate plan	Hardship — Household income fell after a job loss in March 2026; agreed with AJ on 5 Sep 2026
Issued	2026-09-05
Due	2026-10-05
Amount due	180.00
Paid to date	0.00 — nothing recorded
Still outstanding	180.00

Your federal individual tax return	450.00
Full value of work	450.00
Hardship rate applied 60%	-270.00
TOTAL DUE	180.00

WHAT	WHY IT READS THAT WAY	WHAT IT WAS WORTH
Your federal individual tax return return_1000	—	450.00

The work came to \$450.00 at our standard rates; with the hardship applied, the amount due is \$180.00.

Step 14 — Issue it. Photographed during the walk of 5 September 2026.

15 Record the money when it arrives

Do On the invoice, under **Money in**, type what actually arrived, the day, and how. Click **Record this payment**. Part payments are fine — record what came in, not what was due.

CORRECT *Paid to date* and *Still outstanding* both recompute from the ledger.

CAREFUL If more arrives than was billed, *Still outstanding* shows **0.00** and says nothing about the excess. The overpayment appears on **Today** and on the client's printed copy — look there, not here.

Invoice 2026-0001 "Complex work, made clear"

Showing built-in **sample data** (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads. [Clear sample data](#)

Invoice 2026-0001 — Priya Raghavan

This is the invoice as the client reads it. It was issued September 05, 2026 and cannot be edited; correcting it means a new invoice or a credit.

The invoice

Client	Priya Raghavan SATC-001000
Tax year	2025
Rate plan	Hardship — Household income fell after a job loss in March 2026; agreed with AJ on 5 Sep 2026
Issued	2026-09-05
Due	2026-10-05
Amount due	180.00
Paid to date	100.00 — computed from the payment ledger
Still outstanding	80.00

Your federal individual tax return	450.00
Full value of work	450.00
Hardship rate applied 60%	-270.00
TOTAL DUE	180.00

WHAT	WHY IT READS THAT WAY	WHAT IT WAS WORTH
Your federal individual tax return return_1000	—	450.00

The work came to \$450.00 at our standard rates; with the hardship applied, the amount due is \$180.00.

Step 15 — Record the money when it arrives. Photographed during the walk of 5 September 2026.

16 Read Today, every morning

Do Click **Today**. Work the list top down. **Not now** hides a row for this session only.

CORRECT Three groups — *Overdue, This week, Coming up* — each row naming the client, what it is, and the one action. Overpayments, likely extensions and missed deadlines all surface here.

Today "Complex work, made clear."

A. Sethuraman · TY2024

Showing built-in sample data (e.g. the demo's \$145,000 wages) so the app isn't empty — these aren't your clients or real document reads. [Clear sample data](#)

3 things need you · 1 overdue.

Everything below was noticed for you — from your document register, the tax calendar, and last year's return. Nothing here has been sent, signed or filed; each one is ready except the decision.

Overdue · 1

CLIENT	WHAT	DO IT
Priya Raghavan due Apr 15	1040 for 2025 was due Apr 15 US 1040, 2025: overdue by 143 days.	Open client → Not now

This week · 1

CLIENT	WHAT	DO IT
Priya Raghavan due Apr 15	Likely extension — 1040 2025 Your cutoff was Mar 01 and 1 item is still outstanding. An extension needs the client's written authorisation before you file it.	Open client → Not now

Coming up · 1

CLIENT	WHAT	DO IT
Priya Raghavan	\$420.00 overpaid on invoice 2026-0001 \$600.00 has arrived against invoice 2026-0001, which was for \$180.00 — \$420.00 more than was billed. The invoice is settled, so nothing else here mentions it. Refund it or hold it against the next bill; the client is owed the conversation either way.	Open invoice → Not now

"Not now" hides a row for this session only — it resolves nothing. The unsigned 6679 or the missing 1099 is still there, so the row comes back until the reason for it does not.

Step 16 — Read Today, every morning. Photographed during the walk of 5 September 2026.

Part B — The engagement browser — client-documents

17 Start the engagement browser

Do From `client-documents\` run:

```
python web.py
```

to open the real store, or point it somewhere safe to practise:

```
python web.py --store C:\path\to\scratch\folder --port 5071
```

CORRECT It prints the folder it is using before it starts. Read that line. The page shows your engagements and five buttons.

CAREFUL Do not use ports 5060 or 5061 — Chrome refuses them silently and the page will never load.

Step 17 — Start the engagement browser. Photographed during the walk of 5 September 2026.

18 Run the sitting

Do Click **Start an interview** and answer one question per screen. ← **Back** returns to the previous one.

CORRECT A counter such as *3 of about 52*, and a progress bar. Questions you leave blank are recorded as blank rather than guessed.

CAREFUL If a page will not move on and shows no message, the answer was rejected — most often a tax year outside the allowed range. Change the value and try again.

The screenshot shows the IRS 'Which federal return?' screen. At the top, a dark blue header bar contains the text 'SAT-C Saturday 5 September' and 'next 15 September — extended return due for S corporations and partnerships'. Below this, the screen is titled 'WHAT WE ARE PREPARING' with a progress indicator '1 of about 52'. The main heading is 'Which federal return?' followed by a subtext: 'Decides the rest of the interview. 1040 asks about a person and their household; the others ask about an entity and who signs for it.' There are four radio button options, each in a white box with a thin border: 'Form 1040 — individual', 'Form 1120-S — S corporation', 'Form 1065 — partnership', and 'Form 1120 — C corporation'. A dark blue 'Next' button is located below the options.

Step 18 — Run the sitting. Photographed during the walk of 5 September 2026.

19 Check the record before you create it

Do At the end you get **Review** — every question and its answer. Click **Change** on anything wrong, correct it, and click **Save the change**. Then click **Create the engagement**.

CORRECT Blank answers are shown as *left blank*, not as a guess. After creating, the engagement gets its reference and a lifecycle bar: sitting done → pack built → sent → signed → billed → paid → closed.

CAREFUL A fee typed below a stated minimum is accepted here and quietly raised to the minimum on the estimate. Check the fee estimate afterwards against what you agreed.

SAT-C Saturday 5 September / next: 15 September — extended return due for S corporations and partnerships

Review

Which federal return?	Form 1040 — Individual
Original return, or an amendment?	Original return
Which tax year?	2025
Anything that gives you pause?	left blank
Full legal name, as it should appear on the letter	Priya Raghavan and Daniel Okonkwo
Street address	118 Larkspur Lane
City	Riverbend
State	OH
ZIP	45011
Email	priya.raghavan@example.invalid
Is this a joint return?	Joint
Taxpayer's name, as it goes under the signature line	Priya Raghavan and Daniel Okonkwo
Spouse's name	Daniel Okonkwo
Which of these apply to them?	left blank
Which schedules does that come to?	left blank
Which states, and on what basis?	OH
How many state returns?	1
Which localities?	n/a
How many local returns?	1
Apart from W-2s, did any other income document arrive?	No — wages only

Step 19 — Check the record before you create it. Photographed during the walk of 5 September 2026.

20 Read the fee estimate

Do Scroll down the engagement to **Fee estimate**.

CORRECT Each service and its amount, and a total that matches **Estimate total** higher up the page.

CAREFUL This is the price the client is quoted. The desk's own invoice catalogue can produce a different figure for the same work — where they disagree, **the estimate is the one the client agreed to**.

returnscope	view
Married filing jointly jointreturn	True
There was a previous accountant priorfile	False
Period this covers periodstart	2025 tax year
Date on the letter letterdate	September 5, 2026
Date of the estimate estimatedate	September 5, 2026
Estimate total estimatetotal	\$350.00
Engagement reference engagementref	2026-0001

Build the signing pack

Every document this client signs, checked before any of it goes out.

Signatures

Who still has to sign, and recording one that has come back.

Documents

Every document this file can produce, one at a time — to read, to print, or to send. No interview.

Update the quote

The work changed — a second rental, another K-1. See every line that moves before anything is recorded.

Fee estimate

SERVICE	AMOUNT
Simple Filer	\$100.00
Extension with a payment estimate	\$75.00
Records sorting	\$175.00
TOTAL	\$350.00

Step 20 — Read the fee estimate. Photographed during the walk of 5 September 2026.

21 Build the signing pack

Do Click **Build the signing pack**, then **Build the pack**. It takes about a minute, because one of the checks opens every document in a browser to prove it is readable.

CORRECT *The signing pack is built. 11 checks, nothing flagged — and it tells you if a check had nothing to look at. The documents are written to the engagement's **pack** folder, with their stylesheet beside them. If any check fails you get nothing rather than half a pack.*

CAREFUL Leave both checkboxes **unticked**. *“Also read the prose”* crashes the build with a server error after the documents have rendered, and *“Put the invoice in too”* fails unless a bill has already been raised here.

SAT-C Saturday 5 September next 15 September — extended return due for S corporations and partnerships

Priya Raghavan and Daniel Okonkwo
2020-0001 — 2025 TAX YEAR

The signing pack is built. 11 checks, nothing flagged — 1 check had nothing to look at. Nothing has been sent. The documents are waiting in

State returns	OH
Local returns	n/a

Step 21 — Build the signing pack. Photographed during the walk of 5 September 2026.

22 Look at the documents before they go

Do Click **Documents** on the engagement, then **Look at it** on any row.

CORRECT Every document the file can produce, and for the ones not ready, exactly what is still missing. The on-screen copy carries a red **PREVIEW — NOT THE COPY THAT GOES TO THE CLIENT** band; the PDFs in the pack folder do not.

CAREFUL The PDFs are correct, but their internal title still reads “(template)”. Harmless to the content, visible in a PDF reader's title bar.

Step 22 — Look at the documents before they go. Photographed during the walk of 5 September 2026.

If a step does not match its picture, that is either a defect or an out-of-date procedure, and finding out which is the job. Note what you saw, and which step number, before carrying on.

Faults referred to in the **Careful** notes are recorded in full in `docs/WALKTHROUGH-DEFECTS.md`, which is written for whoever fixes them rather than for whoever does this job.
