Every passage this desk hands to an answering agent, put back to the publisher that wrote it. **The question is not whether our tests pass.** It is whether the authority we serve is what the authority actually says — which no test in this repository can answer, because they all read the same stored files.

The same passage, two roads. They meet at the comparison, and the verdict is read off that block rather than written ahead of it.

The roster

0	0	289 of 289	1
DIFFERS	COULD NOT	TIED	SOURCES FETCHED LIVE

Of the **289** that tied, **289** matched the publisher's characters exactly, **0** matched only once whitespace was ignored, and **0** carry a marked omission and were checked segment by segment, in order. All three are declared, and explained under what this does not prove.

289 + 0 + 0 = 289, which is the tied count above. THE SENTENCE USED TO NAME TWO OF THE THREE and so did not add up — 43 and 4 against 49 tied on the cash desk, with the two marked omissions unaccounted for. A breakdown that does not sum to its own total is the failure this exhibit exists to catch, printed by the exhibit.

The sample of one, worked end to end

The longest passage on this desk, because a long one has the most places to be wrong.

1 · THE FIGURE — AND WHERE A READER SEES IT

Not a row of a database: the paragraph of authority the desk hands an answering agent under the citation 26 CFR 1.263(a)-3(j)(3) Example 8. It is read out of ask.brief(), which is the text that agent opens, and it is 4,420 characters long.

(i) G owns a large chain of retail stores that sell a variety of items. G determines that due to changes in the retail market, it can no longer compete in its current store class and decides to upgrade its stores to offer higher end products to a different type of customer. To offer these products and attract different types of customers, G must substantially remodel its stores. Thus, G pays amounts to remodel its stores by performing work on the buildings' structures and systems as defined under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section. This work includes replacing large parts of the exterior walls with windows, replacing the escalators with a monumental staircase, adding a new glass enclosed elevator, rebuilding the interior and exterior facades, replacing vinyl floors with ceramic flooring, replacing ceiling tiles with acoustical tiles, and removing and rebuilding walls to move changing rooms and create specialty departments. The work also includes upgrades to increase the capacity of the buildings' electrical system to accommodate the structural changes and the addition of new section 1245 property, such as new product information kiosks and point of sale systems. The work to the electrical system also involves the installation of new more efficient and mood enhancing lighting fixtures. In addition, the work includes remodeling all bathrooms by replacing contractor-grade plumbing fixtures with designer-grade fixtures that conserve water and energy. Finally, G also pays amounts to clean debris resulting from construction during the remodel, patch holes in walls that were made to upgrade the electrical system, repaint existing walls with a new color scheme to match the new interior construction, and to power wash building exteriors to enhance the new exterior facade.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the facts and circumstances, including the purpose of the expenditure, the physical nature of the work performed, and the effect of the work on the buildings' structures and buildings' systems, the amounts that G pays for the remodeling of its stores result in betterments to the buildings' structures and several of its systems under paragraph (j) of this section. Specifically, the amounts paid to replace large parts of the exterior walls with windows, replace the escalators with a monumental staircase, add a new elevator, rebuild the interior and exterior facades, replace vinyl floors with ceramic flooring, replace the ceiling tiles with acoustical tiles, and to remove and rebuild walls are for material additions, that is the addition of major components, to the building structure under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of the building structure under paragraph (j)(1)(iii) of this section. Similarly, the amounts paid to upgrade the electrical system are to materially increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of this system under paragraph (j)(1)(iii) of this section. In addition, the amounts paid to remodel the bathrooms with higher grade and more resource-efficient materials are reasonably expected to increase the efficiency and quality of the plumbing system under paragraph (j)(1)(iii) of this section. Finally, the amounts paid to clean debris, patch and repaint existing walls with a new color scheme, and to power wash building exteriors, while not betterments by themselves, directly benefitted and were incurred by reason of the improvements to G's store buildings' structures and electrical systems under paragraph (g)(1) of this section. Therefore, G must treat the amounts paid for betterments to the store buildings' structures and systems, including the costs of cleaning, patching, repairing, and power washing the building, as improvements to G's buildings and must capitalize these amounts under paragraphs (d)(1) and (j) of this section. Moreover, G is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1). For the treatment of amounts paid to remove components of property, see paragraph (g)(2) of this section.

2 · THE CALL — COPY-PASTABLE, WITH THE REAL VALUES IN IT

```
curl -sS --compressed "https://www.ecfr.gov/api/versioner/v1/full/2026-08-28/title-26.xml?section=1.263(a)-3"
```

Fetches 2026-09-07 03:19:45Z · 245,744 bytes · SHA-256

3 · THE DERIVATION — WHAT HAPPENS BETWEEN THE TWO

The response is turned into plain text: an XML or HTML document has its inline tags closed up and its block tags turned into a space, a PDF is read page by page. Both sides are then folded the same way — Unicode normalised, and the typographic quotes and dashes

publishers vary between renderings mapped to their plain forms. **Nothing else is changed.**

The stored text either occurs in the publisher's document or it does not.

4 · THE INDEPENDENT SOURCE — CAPTURED, NOT SUMMARISED

The publisher's own words around the match, quoted verbatim out of the bytes whose hash is printed above. **A reader re-fetches that URL, recomputes the hash, and gets the same digits** — which is a check a photograph cannot offer.

...operty in accordance with § 1.263(a)-2(d)(1). Example 8. Betterment; building remodel (i) G owns a large chain of retail stores that sell a variety of items. G determines that due to changes in the retail market, it can no longer compete in its current store class and decides to upgrade its stores to offer higher end products to a different type of customer. To offer these products and attract different types of customers, G must substantially remodel its stores. Thus, G pays amounts to remodel its stores by performing work on the buildings' structures and systems as defined under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section. This work includes replacing large parts of the exterior walls with windows, replacing the escalators with a monumental staircase, adding a new glass enclosed elevator, rebuilding the interior and exterior facades, replacing vinyl floors with ceramic flooring, replacing ceiling tiles with acoustical tiles, and removing and rebuilding walls to move changing rooms and create specialty departments. The work also includes upgrades to increase the capacity of the buildings' electrical system to accommodate the structural changes and the addition of new section 1245 property, such as new product information kiosks and point of sale systems. The work to the electrical system also involves the installation of new more efficient and mood enhancing lighting fixtures. In addition, the work includes remodeling all bathrooms by replacing contractor-grade plumbing fixtures with designer-grade fixtures that conserve water and energy. Finally, G also pays amounts to clean debris resulting from construction during the remodel, patch holes in walls that were made to upgrade the electrical system, repaint existing walls with a new color scheme to match the new interior construction, and to power wash building exteriors to enhance the new exterior facade. (ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the facts and circumstances, including the purpose of the expenditure, the physical nature of the work performed, and the effect of the work on the buildings' structures and buildings' systems, the amounts that G pays for the remodeling of its stores result in betterments to the buildings' structures and several of its systems under paragraph (j) of this section. Specifically, the amounts paid to replace large parts of the exterior walls with windows, replace the escalators with a monumental staircase, add a new elevator, rebuild the interior and exterior facades, replace vinyl floors with ceramic flooring, replace the ceiling tiles with acoustical tiles, and to remove and rebuild walls are for material additions, that is the addition of major components, to the building structure under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of the building structure under paragraph (j)(1)(iii) of this section. Similarly, the amounts paid to upgrade the electrical system are to materially increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of this system under paragraph (j)(1)(iii) of this section. In addition, the amounts paid to remodel the bathrooms with higher grade and more resource-efficient materials are reasonably expected to increase the efficiency and quality of the plumbing system under paragraph (j)(1)(iii) of this section. Finally, the amounts paid to clean debris, patch and repaint existing walls with a new color scheme, and to power wash building exteriors, while not betterments by themselves, directly benefitted and were incurred by reason of the improvements to G's store buildings' structures and electrical systems under paragraph (g)(1) of this section. Therefore, G must treat the amounts paid for betterments to the store buildings' structures and systems, including the costs of cleaning, patching, repairing, and power washing the building, as improvements to G's buildings and must capitalize these amounts under paragraphs (d)(1) and (j) of this section. Moreover, G is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)-2(d)(1). For the treatment of amounts paid to remove components of property, see paragraph (g)(2) of this section. Example 9. Not betterment; relocation and reinstallation of personal property In Year 1, H purchases new cash registers for use in its retail store located in leased space in a shopping mall. Assume that each cash register is a unit of property as determined ...

The sources, and that they can disagree with us

- **S1** — Treasury Regulation § 1.263(a)-3 — Amounts paid to improve tangible property
[https://www.ecfr.gov/api/versioner/v1/full/2026-08-28/title-26.xml?section=1.263\(a\)-3](https://www.ecfr.gov/api/versioner/v1/full/2026-08-28/title-26.xml?section=1.263(a)-3)

Not one of these is ours. None is a cache, a fixture or a second copy of our own record — which is the test the tie-out skill puts first: **could this disagree with me?** Each one can, and two of them did.

How to run this yourself

Every step below has the real values already in it. Nothing here needs me.

1 · RE-RUN THE WHOLE CHECK

```
cd desk && python -B tools/tieout.py
```

It fetches every source live and writes tie-outs/findings.json. Expect it to take a few minutes: it pauses between requests rather than hammering the publishers.

2 · REBUILD THESE DOCUMENTS FROM THAT RUN

```
cd desk && python -B tools/tieout_exhibit.py
```

3 · CHECK ONE LINE BY HAND, WITHOUT EITHER SCRIPT

Take any row in the roster, fetch its URL, and look for the text yourself:

```
curl -sS --compressed "https://www.ecfr.gov/api/versioner/v1/full/2026-08-28/title-26.xml?section=1.263(a)-3" | shasum -a 256
```

If that hash matches the one printed with the exemplar above, you are reading the same bytes this document read. Then search the document for the passage — the desk prints it under that citation in the brief:

```
cd desk && python -B -c "import sys; sys.path.insert(0, '.'); import ask, record, pathlib; \
print(ask.brief('show me', record.load(pathlib.Path('desks/fixed-assets'))))" | less
```

What it found

Nothing, and that sentence had to be earned three times over. All 531 passages the seven desks hand an answering agent are, today, what the publisher publishes: **0 differs, 0 could not.** The run this morning said 533 and two; the one before it said 88 differences. What changed in between is the record and the checker, and both are worth reading before this figure is believed.

The three findings this run closed, each fixed in the record rather than in the check.

- **Right text, wrong link — three passages.** The rewards desk stored § 6041, § 6041A, § 6050W and § 6071 under ONE source whose recorded URL is the House's granule for **§ 6041 only**. All four bodies were **verbatim correct**, so nothing served was ever wrong and no test in the repository could have seen it — a reader following the citation for three of the four simply landed on a page that did not contain it. **Only opening the link finds this.** Split into four sources, four URLs, each verified live; and the record now has a test comparing the URL a citation is really on with the URL its source claims.
- **A partial quotation that did not say it was one.** Publication 583's sentence has two branches and the cash desk stored the second without marking the omission. The split is right — the branches have opposite answers, which is the defect #264 found — but an answerer could not tell a branch had been removed. Marked now with [. . .], and the mark is CHECKED rather than excused: every segment must appear in the live document, in order.
- **A publisher's interface text inside a quotation.** irs.gov appends the word **PDF** to links that point at PDFs, and one sits mid-sentence on the tangible-property page. Ours dropped it. This was judged in our favour this morning and left; it is the same unmarked omission as Pub 583, and it is marked now. It was the last difference in the corpus.

What "nothing" is worth here. Three of the 531 tied only because a marked omission was checked segment by segment, and 13 tied only once whitespace was ignored. Both are declared, both are counted on each desk's own sheet, and neither is silently folded into the headline. A clean run that hides how it got clean is the thing this exhibit exists not to be.

What I got wrong

The first run reported 88 differences and 34 of them were mine. The extractor replaced every markup tag with a space, so eCFR's `</I>(1)` came back as `election - (1)` and `601.601(d)(2)(ii)<I>b</I>` as `( b )`. A checker that invents differences is worse than no checker, because somebody goes and "fixes" the record to match it. Inline tags now close up and only block tags become a space.

Then it reported 18, and 16 of those were mine too. pypdf reads a kerned two-column IRS page as `Y ou` and hyphenates `infor-mation` across a line break, and irs.gov puts block markup inside a sentence. Those are rendering artefacts of the extractor, not differences in what was published — so the comparison now runs twice, and the exhibit says which pass carried each line rather than quietly folding them together.

I could not capture the sources as photographs, and the skill asks for photographs.

This machine's browser cannot reach the publishers even when pointed at the egress proxy — `ERR_CONNECTION_RESET` — while the HTTP client reaches them fine. Attempted, failed, recorded. What is here instead is the document itself: its SHA-256, its length, the moment it was fetched and the publisher's own words quoted around each match. For text that is the stronger evidence, because a reader can recompute the hash and a screenshot cannot be re-verified at all.

What this does not prove

- **It proves the words, not the reading.** That § 1.263(a)-1(f)(1)(ii)(D) says \$500 is now established. Whether \$500 is the number that governs a client is a question about Notice 2015-82 and about the firm's election, and no fetch settles it.
- **It proves containment, not completeness.** The check asks whether our passage occurs in the publisher's document. It does not ask whether we stored the *whole* of what that citation covers — a passage could be a true fragment of a paragraph whose second half changes its meaning. Publication 583 above is exactly that failure caught by accident, not by design.
- **The whitespace-ignoring pass can hide a genuinely missing space.** 13 lines tied only on that pass. Each is named in the roster as spacing so nobody has to take it on trust.
- **The regulations were fetched as of 2026-08-28, not today.** eCFR's versioner refuses a future date and this is the last date known good on it. A regulation amended between that date and now would not show here.
- **One reading, not two.** The skill asks for a second rendering where one exists — the XML and the rendered page, the PDF and the HTML. Only one rendering per source was read. A digit or a word wrong in *both* our copy and the one rendering we read would pass.
- **Nothing here touches whether a desk answers well.** This is about the authority it is given. A desk with a perfect corpus can still reason badly from it, and that is what the scoreboard is for.
