A credit file review, from tool to released record

Workpaper Studio · walked through the screens on 2 November 2026 · synthetic people and data · the limit and method are fictional demonstrations

Four people take part: a **designer** who proposes the tool, an **approver** who approves it, an **admin** who confirms the organization's limit, a **preparer** who completes the case, and a **reviewer** who reviews, approves and releases it. Nobody approves their own work.

The route

A red ring marks the control each step is about. Where the thing to read is small, a close-up is shown first and the full screen after it.

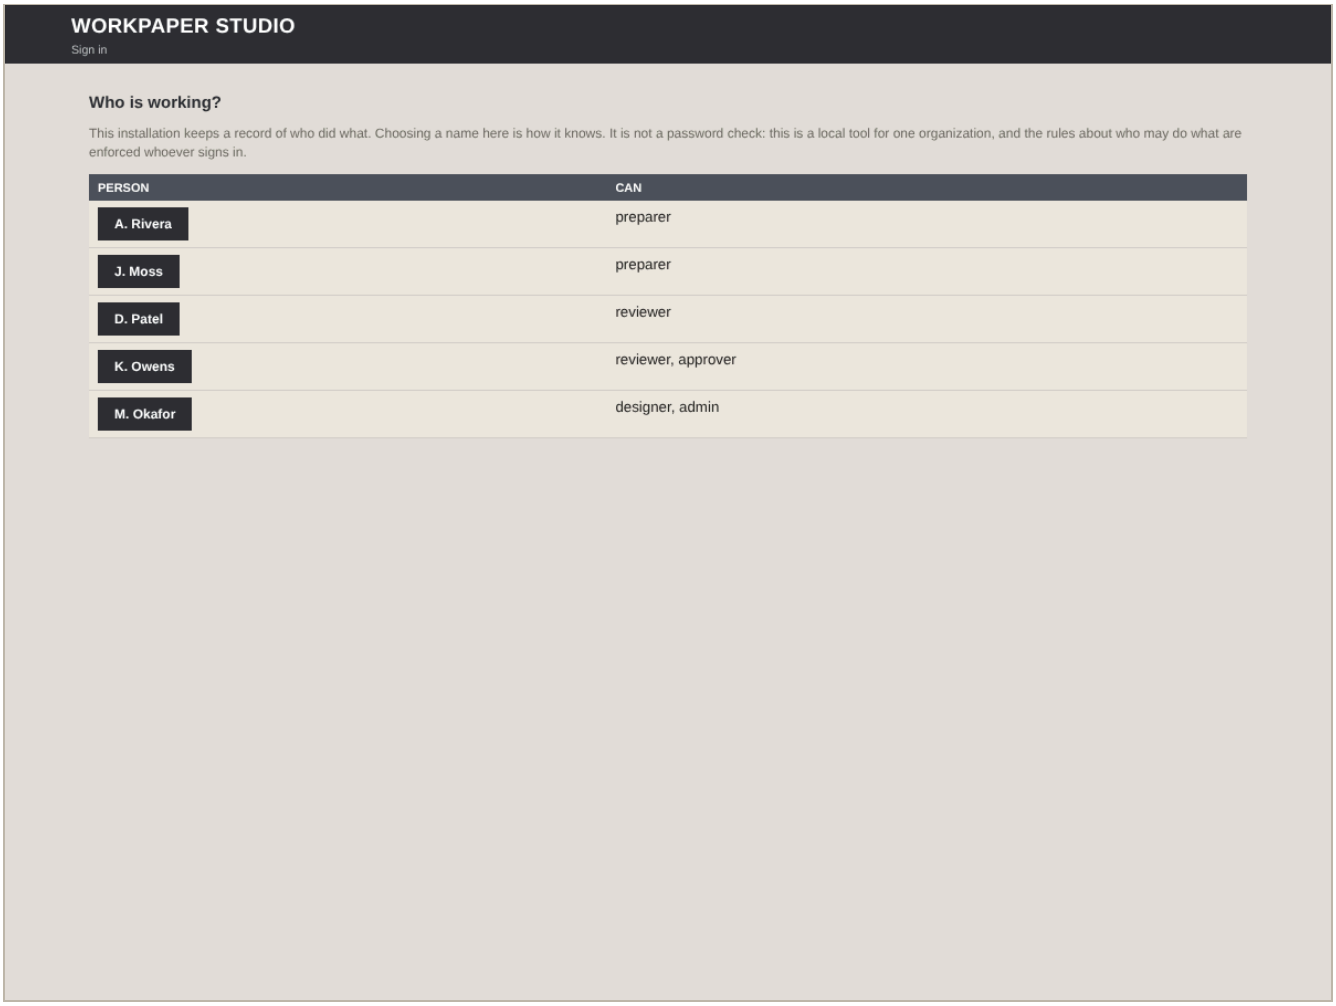

Set up the tool

1. Sign in

ANYONE

Do. Open the app (http://127.0.0.1:5077). Choose your name on “Who is working?”.

A correct screen. A list of five people, each with what they can do. Choosing a name is not a password check; it is how the record knows who did what.

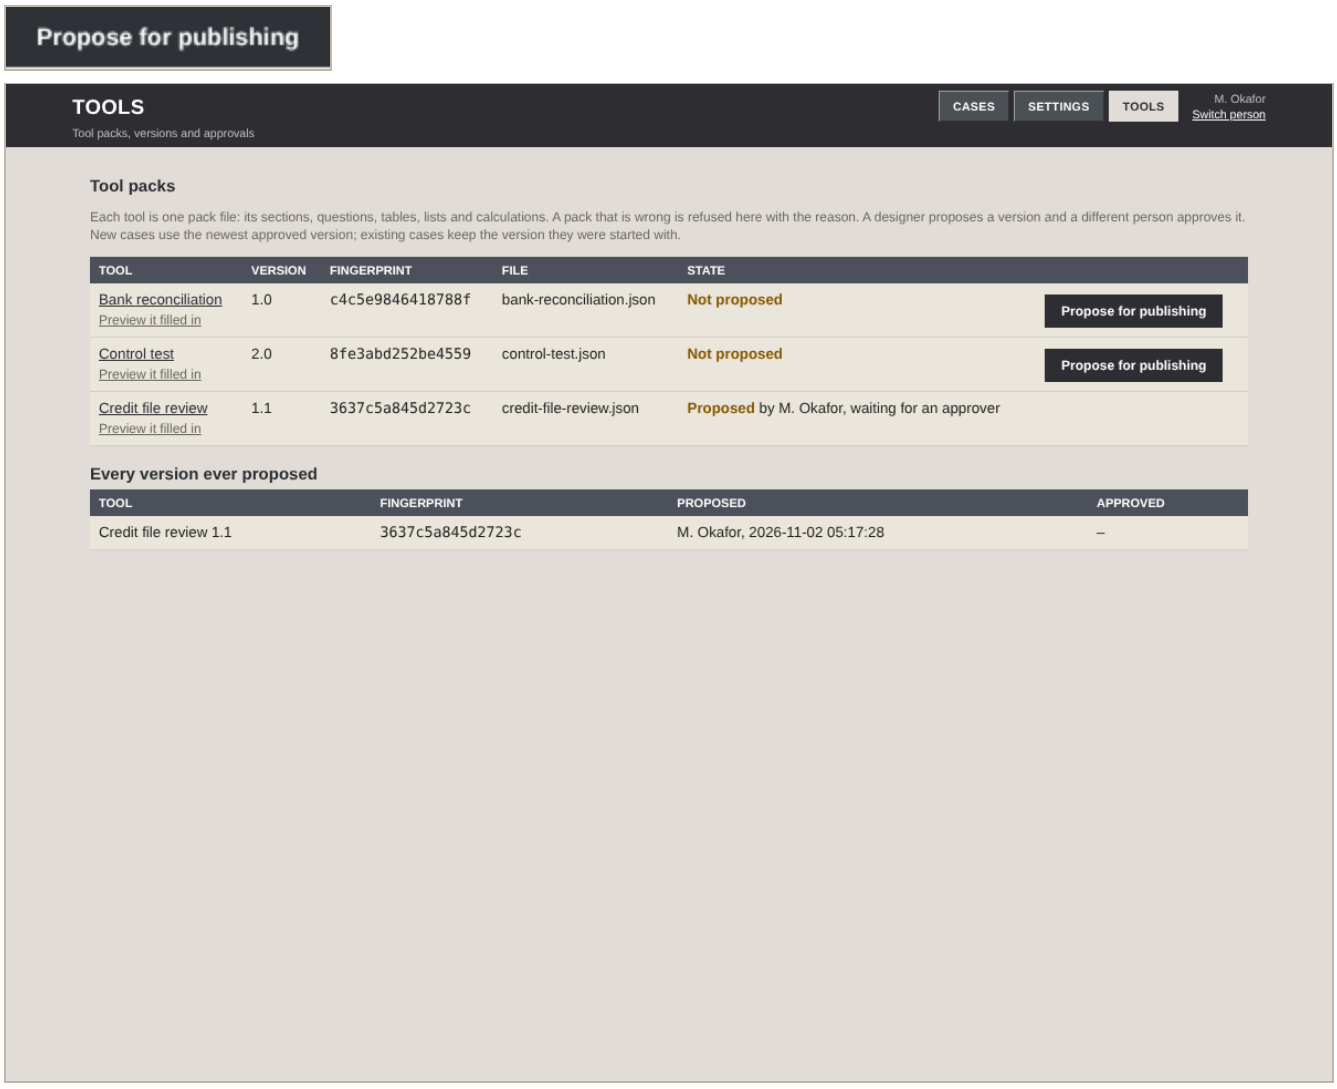

2. Propose the tool for publishing

DESIGNER (M. OKAFOR)

Do. Go to **Tools**. On the Credit file review row, click **Propose for publishing**.

A correct screen. The row's state changes to “Proposed by M. Okafor, waiting for an approver”. You will not see an Approve button: nobody approves their own proposal.

3. Read the tool and approve it

APPROVER (K. OWENS)

Do. Sign in as the approver. On **Tools**, click the tool's name to read its outline, and **Preview it filled in** to see it working on the pack's own example. Then go back and click **Approve**.

A correct screen. The preview says nothing in it is saved. After approval the state reads “Published: proposed by M. Okafor, approved by K. Owens”. New cases now use this version; the fingerprint identifies it exactly.

credit-file-review.json · fingerprint 3637c5a845d2723c. This is the configuration; the case screens are generated from it. See it filled in with the pack's example.

TESTER DETAILS

Required

- Field: Tester (list, required)
- Field: Test date (date, required)

REVIEWER DETAILS

Required

- Field: Reviewer (list, required)
- Field: Review date (date)

SCOPE

Required

- Field: Quarter end (list, required)
- Field: Scope (text)

BORROWER DETAILS

Required

- Field: Borrower name (text, required, personal)
- Field: Security (choice, required)
- Field: New money request? (list, required)

FACILITIES

Required

- Table: Facilities. Rows entered, columns fixed (Facility type, Rating, Commitment, Outstanding)

TEST QUESTIONS

Required

- Table: Test questions. Rows fixed, columns fixed (Rating, Comment)

SUPPORTING ANALYSIS

Optional · screen Analysis

- Table: Owner and guarantor cash flow. Rows fixed, columns entered
- Table: Collateral valuation. Rows list, columns fixed (Value, Advance %, Adjusted value)
- Table: Income sources. Rows entered, columns fixed (Source, Amount, Per)
- Table: Existing debts. Rows entered, columns fixed (Creditor, Monthly payment)
- Field: Proposed monthly payment (number, required)
- Calculation: DTI-DEMO 1.0, recommended limit 0.4

CONCLUSION

Required

- Field: Is the credit qualified? (list, required)
- Field: Overall summary (longtext, required)

Lists

LIST	VALUES
Yes / No	Yes, No
Effectiveness	Effective, Partially effective, Not effective, Not applicable
Testers	A. Rivera, B. Chen, C. Okafor
Reviewers	D. Patel, E. Moreau
Quarter ends	2026-09-30, 2026-12-31, 2027-03-31
Facility types	Term loan, Line of credit, Equipment loan, SBA term loan
Collateral classes	Cash, Marketable securities, Accounts receivable, Inventory, Equipment, Real estate
Exception reasons	Compensating strength documented, Approved by a higher authority, Policy exception on file, Other (explained in the note)

Inventory			
Equipment	$190,000	70	$133,000
Real estate	$240,000	80	$192,000
Total	**$430,000**		**$325,000**

INCOME SOURCES

	SOURCE	AMOUNT	PER
Income 1	Owner salary	$96,000	Annual
Income 2	Rental, 14 Dock St	$1,450	Monthly
Income 3	Spouse wages	$3,200	Monthly
Income 4			

EXISTING DEBTS

	CREDITOR	MONTHLY PAYMENT
Debt 1	Auto loan	$612
Debt 2	Credit card	$95
Debt 3	Student loan (deferred)	$0
Debt 4		

Proposed monthly payment $5,780

DEBT-TO-INCOME

DTI-DEMO 1.0

Monthly income	$12,650	
Existing monthly debt payments	$707	
Proposed monthly payment	$5,780	
Inputs still missing	0	
Debt-to-income	**51.3%**	**Above limit**

Limit 40.0%, set by the organization on Settings (confirmed by D. Patel (example) on 2026-10-02). It is not part of the method.

Disclosed

- Debt "Student loan (deferred)" payment entered as zero and counted as zero

Exception The result stays as calculated. An exception is recorded beside it.

Switch person

Tool packs

Each tool is one pack file: its sections, questions, tables, lists and calculations. A pack that is wrong is refused here with the reason. A designer proposes a version and a different person approves it. New cases use the newest approved version; existing cases keep the version they were started with.

TOOL	VERSION	FINGERPRINT	FILE	STATE
Bank reconciliation Preview it filled in	1.0	c4c5e9846418788f	bank-reconciliation.json	**Not proposed**
Control test Preview it filled in	2.0	8fe3abd252be4559	control-test.json	**Not proposed**
Credit file review Preview it filled in	1.1	3637c5a845d2723c	credit-file-review.json	**Published**: proposed by M. Okafor, approved by K. Owens

Every version ever proposed

TOOL	FINGERPRINT	PROPOSED	APPROVED
Credit file review 1.1	3637c5a845d2723c	M. Okafor, 2026-11-02 05:17:28	K. Owens, 2026-11-02 05:17:29

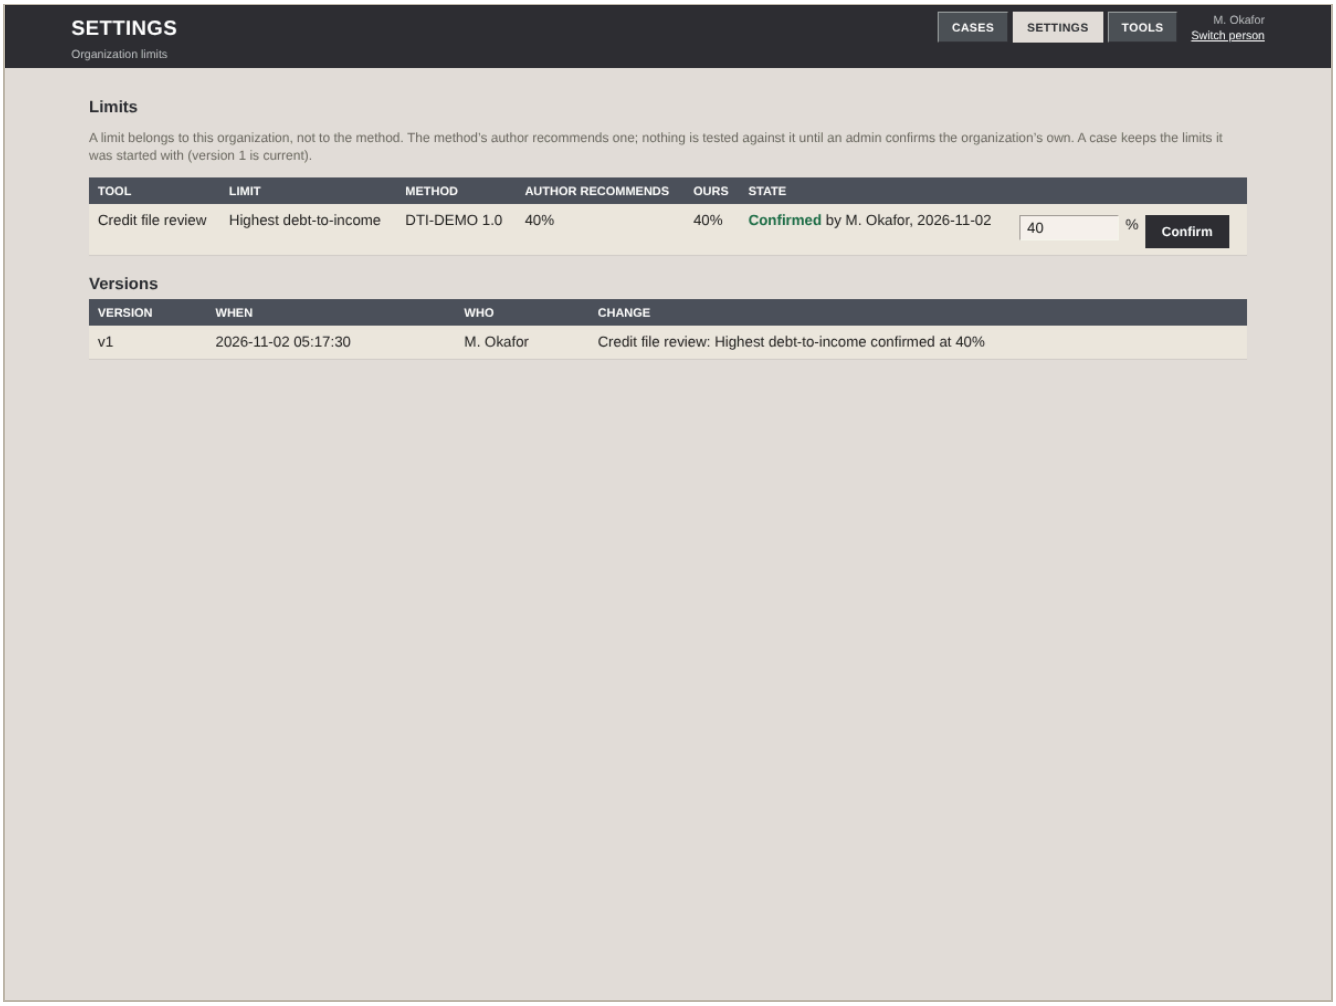

4. Confirm the organization's limit

ADMIN (M. OKAFOR)

Do. Go to **Settings**. The debt-to-income limit is *Not confirmed*. Type your organization's limit (40 for this demonstration) and click **Confirm**.

A correct screen. State reads “Confirmed by M. Okafor” with the date, and a new version appears under Versions. Until a limit is confirmed, no result is tested against it. The 40% is fictional.

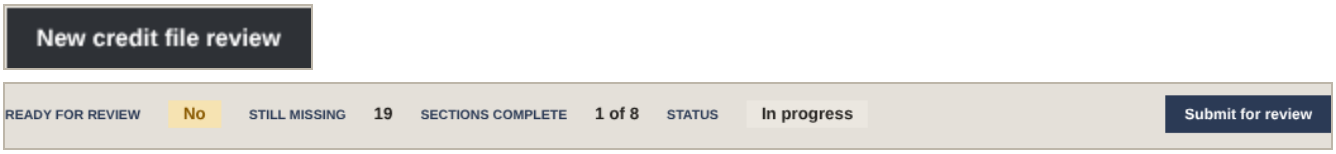

Prepare the case

5. Start a case

PREPARER (A. RIVERA)

Do. Sign in as the preparer. On **Cases**, click **New credit file review**.

A correct screen. A new case opens (CFR-0001). Every required box is amber. The strip says Ready for review: No, Still missing: 19.

TEST QUESTIONS

Risk rating

1.01 Is the assigned risk rating supported by the credit file?
▶ How to test

1.02 Is each facility rating consistent with the borrower rating?
▶ How to test

Data accuracy

2.01 Does the rating in the system of record match the approval document?
▶ How to test

2.02 Is the industry code correct in the system of record?
▶ How to test

Policy exceptions

3.01 Are all policy exceptions noted and mitigated in the approval document?
▶ How to test

Approval authority

4.01 Was the credit approved by someone with enough authority?
▶ How to test

Repayment analysis

5.01 Were all liabilities considered in the repayment analysis?
▶ How to test

5.02 *if new money request*
For a new money request, was the required analysis completed with current information?
▶ How to test
Waiting on "New money request?".

Collateral

6.01 *if secured*
Was the collateral eligible, valued and documented?
▶ How to test
Waiting on "Security".

9 missing

CONCLUSION

Is the credit qualified?

Overall summary

Required

2 missing

6. Fill the detail panels

PREPARER

Do. Fill Tester, Test date, Reviewer, Quarter end, Scope, Borrower name, Security and New money request. Each entry saves when you leave the box.

A correct screen. Each panel's footer turns to a green Complete. “Saved” appears at the foot of the page. Still missing drops to 12. Tab moves on as you would expect; each box's small N/A button is one Tab stop of its own.

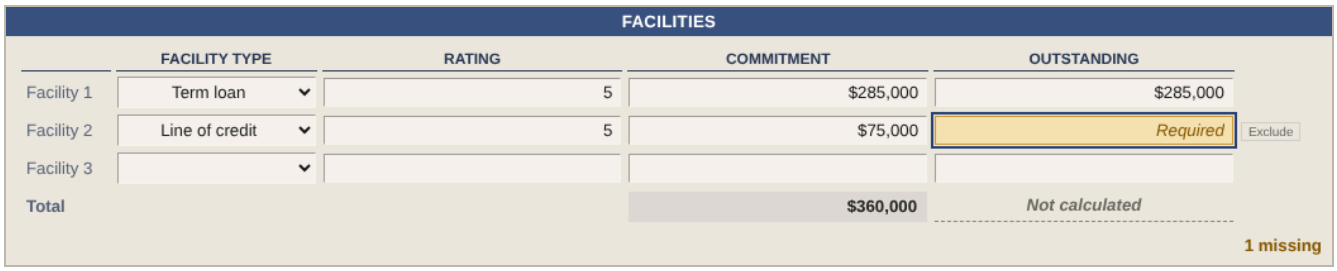

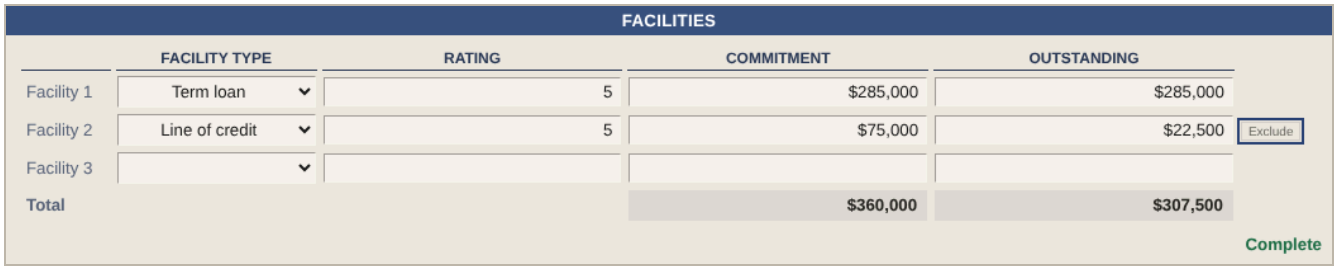

7. Enter the facilities

PREPARER

Do. Enter each facility on its own row: type, rating, commitment, outstanding. A new empty row appears as you use the last one.

A correct screen. A row that is started but incomplete shows its missing box in amber, the section says “1 missing”, and the total under that column reads **Not calculated** until the gap is filled. When every row is complete the footer reads Complete.

8. Answer the test questions

PREPARER

Do. Rate each question from the list. Open *How to test* under a question to read its steps. Write a comment where you have one.

A correct screen. Ratings show in green, amber or red. A rating of Partially or Not effective makes the comment box amber and required until you write one. Questions that depend on an answer (for example 5.02, only for new money) say so under the number.

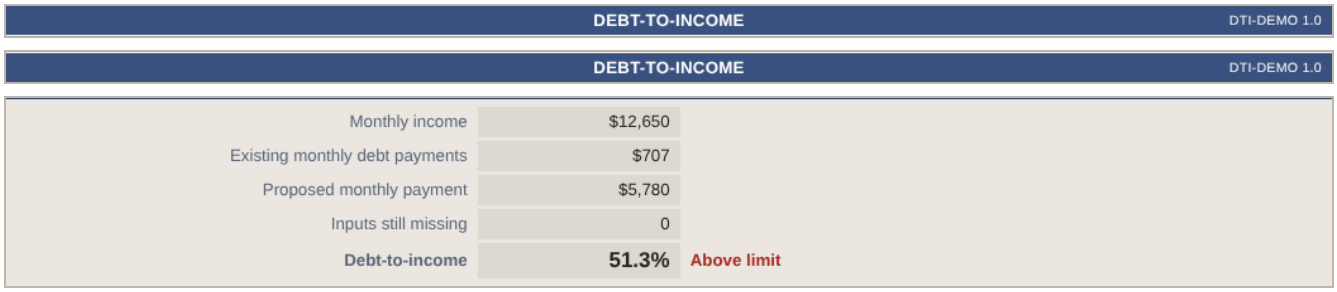

9. Complete the supporting analysis

PREPARER

Do. Click **Analysis** in the band. Enter income sources, existing debts and the proposed monthly payment. The cash flow and collateral tables are optional.

A correct screen. While any input is missing, debt-to-income reads **Not calculated**, never 0. The reason is listed under “Why there is no result”. When every input is in, the result shows (51.3% here) with its verdict against the confirmed limit. A zero payment is disclosed, not hidden.

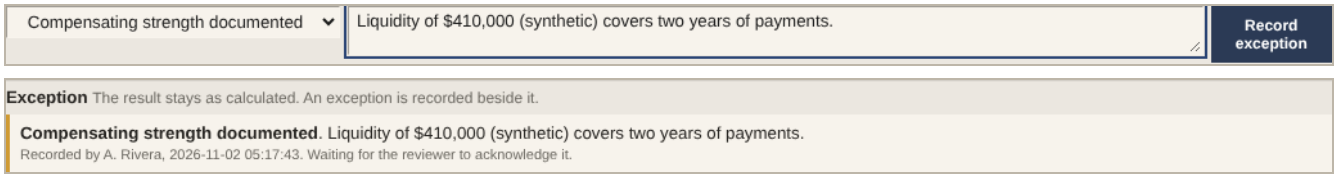

10. Record an exception for a result above the limit

PREPARER

Do. Under the result, choose a reason, explain it, and click **Record exception**.

A correct screen. The exception is listed beside the result, “Waiting for the reviewer to acknowledge it”. The result itself does not change.

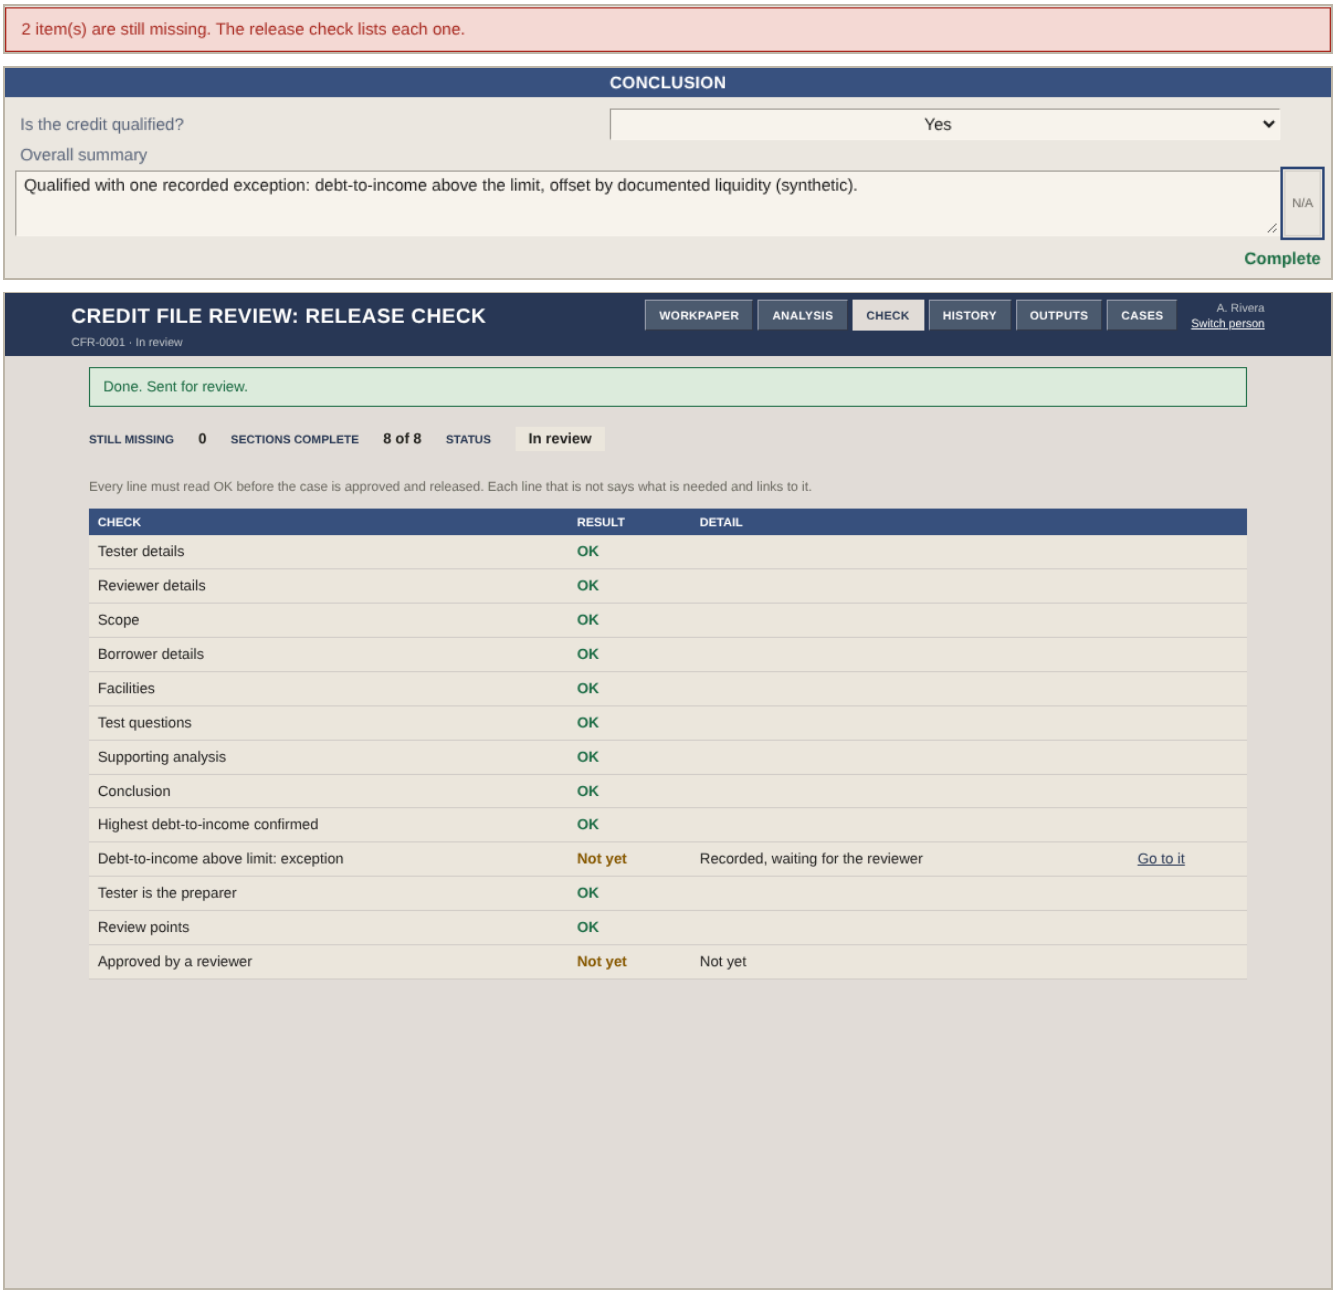

11. Submit for review

PREPARER

Do. Click **Submit for review**. If anything is missing you land on the release check with a message; click **Go to it** on each line, fill it, and submit again.

A correct screen. When it goes through, the Status chip reads **In review** and your boxes lock. Every line on the release check is OK except the exception (waiting for the reviewer) and the approval.

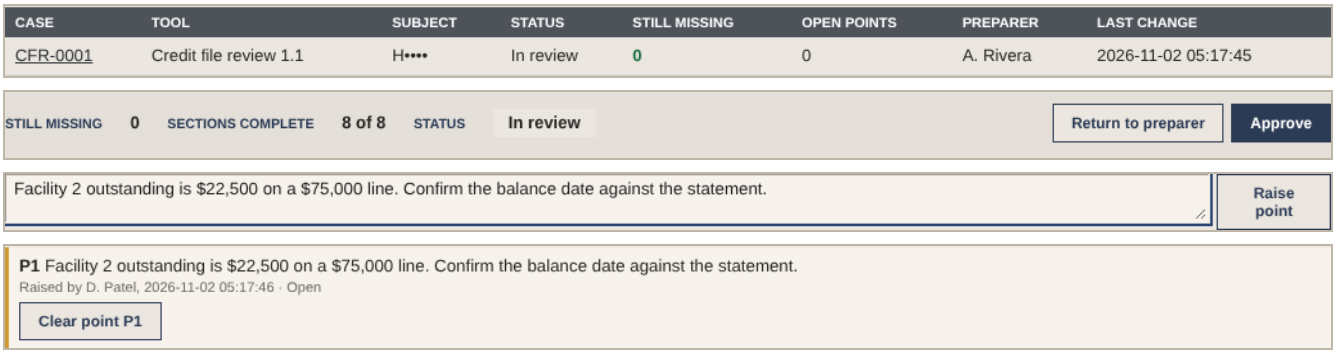

Review

12. Open the case and raise a point

REVIEWER (D. PATEL)

Do. Sign in as the reviewer. The case is under **Waiting for your review**; open it. Under the section concerned, write the point and click **Raise point**.

A correct screen. Your boxes are read-only: a reviewer never changes the preparer's entries. The point shows as Open with your name and the time.

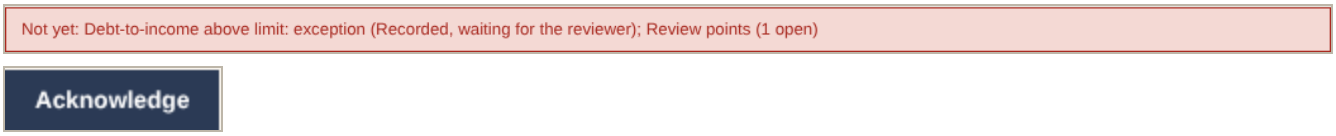

13. Acknowledge the exception

REVIEWER

Do. Clicking **Approve** now is refused, and the message names what is open. Go to **Analysis** and click **Acknowledge** on the exception.

A correct screen. The exception reads “Acknowledged by D. Patel” with the time.

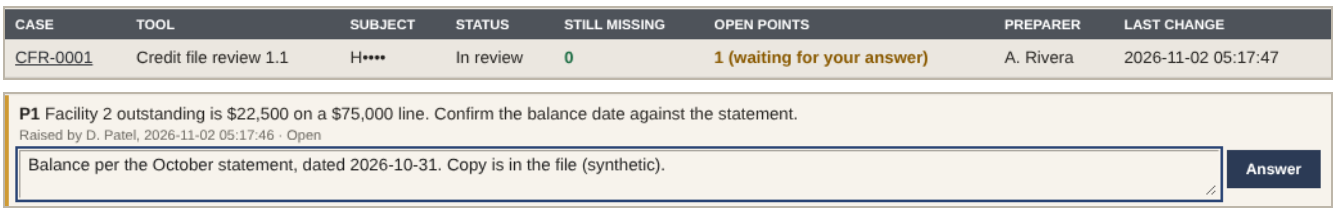

14. Answer the point

PREPARER

Do. Sign in as the preparer. Your Cases list shows “1 (waiting for your answer)” under Open points. Open the case: a banner at the top links to the point. Write your answer under it and click **Answer**.

A correct screen. Your answer appears under the point with your name and the time.

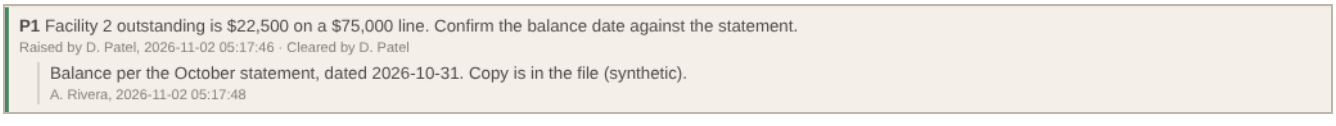

Approve and release

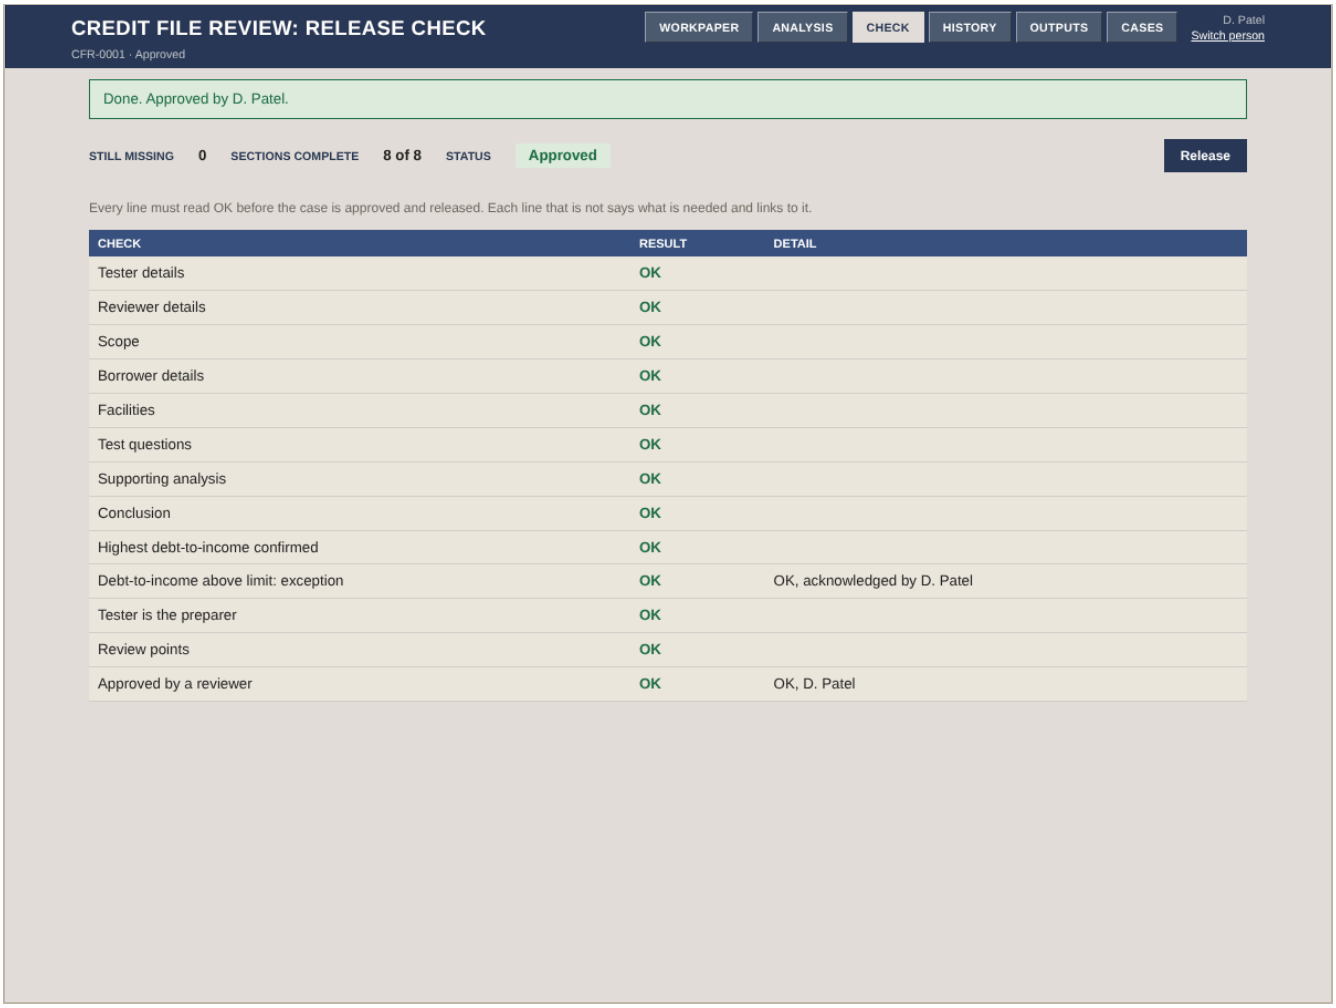

15. Clear the point, approve, release

REVIEWER

Do. Sign in as the reviewer. Click **Clear point P1**, then **Approve**, then **Release**.

A correct screen. The point reads Cleared. Each action confirms itself in a green banner. The status goes to Approved, then Released, and Outputs lists the released files, each with its SHA-256 fingerprint: the data feed (JSON and CSV) and the workbook. The workbook has an Exceptions and review sheet; the borrower's name is masked in every released file.

FILE	SHA-256	WRITTEN
CFR-0001.feed.csv	90ba7bfaa5b40a7d	2026-11-02 05:17:50
CFR-0001.feed.json	7cf0851ab7e75c3d	2026-11-02 05:17:50
CFR-0001.xlsx	be1961f0786641d6	2026-11-02 05:17:50

16. Read the record

ANYONE

Do. Click **History**.

A correct screen. Every entry and every action, newest first, with who and when. Nothing in it can be changed or removed; the case on screen is rebuilt from it.
