

Citibank NA — 2019

FDIC certificate 7213 · 272 values across 4 quarter(s) · every one shown beside the line the bank filed it on

The same figure travels two roads. Only the lower one goes through a document this firm does not control.

What this document is. The left number in each pair is read out of `verified-data/bank-values.csv`, the file the firm opens. The right number is read off the bank's own Call Report as the regulator serves it. The photograph beneath them is that page, cropped to the row, with the filing's own header above it so you can see whose filing it is and for which period.

To check any of it yourself: open the filing link under a quarter heading, search the page for the eight-character code (an *MDRM code* — the Federal Reserve's permanent name for one line on the form), and read the number beside it.

What this does not prove

That the bank was right. A value can match its filing to the dollar and the filing can still be wrong; this proves faithful copying and nothing beyond it.

Anything shaded grey is a value of exactly zero — a category where this bank has no exposure. It ties, and it is the weakest form of agreement there is.

Ratios the FDIC computes have no line on the form to photograph, so they carry no picture here. The lines they are computed from do.

Nothing in this document was checked by a second person.
